## PURCHASING MANAGERS' INDEX

## NOVEMBER 2015 REPORT

SURVEY MANAGEMENT DIVISION STATISTICS DEPARTMENT<br>CENTRAL BANK OF NIGERIA, ABUJA

### 1.0 Purchasing Managers' Index (PMI) Report

### 1.1 About this Report

The Statistics Department, Central Bank of Nigeria conducts on monthly basis the survey of purchasing and supply executives of manufacturing and non-manufacturing organizations in 13 locations in Nigeria: - two states in each of the six geo-political zones, and the FCT (See Fig. 1). The survey result is used to compute the monthly Purchasing Managers Index (PMI). The November survey was conducted during November 16-20, 2015 with a total retrieval of 1,430 out of 1,584 questionnaires administered, giving a response rate of 90.3 per cent. The Central Bank makes no representation regarding the individual company, other than that stated by the respondents. The data contained herein could be compared with other economic data in taking policy decisions.

### 1.2 Data and Method of Presentation

The Manufacturing and Non-manufacturing PMI Report on businesses is based on data compiled from purchasing and supply executives. Survey responses reflect the change, if any, in the current month compared with the previous month. For each of the indicators measured, this report shows the percentage response and the diffusion index. The diffusion index includes the percent of positive responses plus one-half of the percent of those reporting no change. The composite PMI is the weighted average of five diffusion indices: production level, new orders, supplier delivery time, employment level and raw materials inventory. The weights assigned to these indices are $25 \%, 30 \%, 15 \%, 10 \%$ and $20 \%$, respectively.

Diffusion indices have the properties of leading indicators and are convenient summary measures showing the prevailing direction of change and the scope of change. A composite PMI reading above 50 percent indicates that the manufacturing economy is generally expanding; below 50 percent indicates that it is generally declining. The sub-sectors reporting growth are listed in the order of highest to least growth. For the sub-sectors reporting contraction/decline, they are listed in the order of the highest to the least decline.

### 2.0 Manufacturing PMI Report

Production level growing at a faster rate; new orders growing from contraction; raw material inventories increasing at a slower rate; supplier delivery time declining at a slower rate; and employment level decreasing at a faster rate.

The Manufacturing PMI at 51.2 expanded in the month of November from the contractionary level of 49.2 in the preceding month (See Fig. 2 and Table 1). Of the sixteen manufacturing subsectors, nine sub-sectors reported expansion in the review month in the following order: cement; primary metal; food, beverage \& tobacco products; appliances \& components; textile, apparel, leather \& footwear; furniture \& related products; fabricated metal products; petroleum \& coal products and transportation equipment. The remaining seven sub-sectors however reported contraction in the following order: nonmetallic mineral products; printing \& related support activities; electrical equipment; plastics \& rubber products; chemical \& pharmaceutical products; computer \& electronic products and paper products.

$\backslash 1$ The composite PMI is a weighted average of the following diffusion indices: production level, new orders, supplier deliveries, employment level and inventories. The weights assigned to these variables are $25 \%, 30 \%, 15 \%, 10 \%$ and $20 \%$ respectively.
*The series index is a diffusion index defined as a weighted percentage of high, same and low with $1.0,0.5$ and 0.0 as weights respectively.

### 2.1 Production Level

The Production Level Index in November 2015 registered 55.4 percent, indicating an increase in production in the review month. The index grew at a faster rate when compared with the level in the preceding month. Of the sixteen manufacturing sub-sectors, eleven sub-sectors reported growth in production during the review month in the following order: cement; primary metal; transportation equipment; appliances and components; food, beverage \& tobacco products; fabricated metal products; furniture \& related products; paper products; textile, apparel, leather \& footwear; petroleum \& coal products and plastics \& rubber products. The chemical \& pharmaceutical products sub-sector reported no change. The remaining four reported contractions in production during the review month in the following order: nonmetallic mineral products; printing \& related support activities; computer \& electronic products and electrical equipment (See Table 2).

### 2.2 New Orders

New Orders Index registered 52.9 percent in November indicating an increase in new orders. The index rose from a contraction of 49.3 points achieved in the previous month. The eleven sub-sectors that reported increase in new orders were: cement; primary metal; petroleum \& coal products; appliances and components; fabricated metal products; food, beverage \& tobacco products; textile, apparel, leather \& footwear; computer \& electronic products; transportation equipment; chemical \& pharmaceutical products and furniture \& related products. The plastics \& rubber products sub-sector reported no change. The remaining four sub-sectors reported declines in new order in the order: petroleum \& coal products; nonmetallic mineral products; printing \& related support activities; electrical equipment and paper products.

### 2.3 Supplier Delivery Time

At 47.3 percent, the supplier delivery time index for manufacturing sub-sectors declined for the tenth consecutive month. The index declined at a slower rate when compared with the level in October, 2015. Ten sub-sectors reported a decline in suppliers' delivery time in the following order: appliances \& components; transportation equipment; fabricated metal products; computer \& electronic products; cement; chemical \& pharmaceutical products; petroleum \& coal products; textile, apparel, leather \& footwear; food, beverage \& tobacco products and plastics \& rubber products. The remaining six sub-sectors reported faster delivery time in November in the order of: nonmetallic mineral products; primary metal; printing \& related support activities; furniture \& related products; electrical equipment and paper products (See Table 4).

### 2.4 Employment Level

Employment level index in the month of November 2015 stood at 45.5 percent, indicating a decline in employment in the manufacturing sector for the ninth consecutive month. The employment level decreased at a faster rate when compared with its level in October, 2015. Of the sixteen sub-sectors, eleven recorded decline in the following order: nonmetallic mineral products; printing \& related support activities; plastics \& rubber products; chemical \& pharmaceutical products; paper products; transportation equipment; fabricated metal products; petroleum \& coal products; primary metal; furniture \& related products and food, beverage \& tobacco products. Two sub-sectors, namely appliances \& components and electrical equipment reported no change. The remaining three sub-sectors reported growth in the
following order: computer \& electronic products; cement and textile, apparel, leather \& footwear (See Table 5).

### 2.5 Raw Materials Inventory

The raw materials inventory index dropped to 52.2 percent in November from the 53.1 percent obtained in the preceding month. Nine of the sixteen sub-sectors reported higher raw materials inventories in the following order: electrical equipment; cement; food, beverage \& tobacco products; appliances \& components; textile, apparel, leather \& footwear; furniture \& related products; fabricated metal products; computer \& electronic products and chemical \& pharmaceutical products. The remaining seven sub-sectors reported lower inventories in the following order: petroleum \& coal products; primary metal; printing \& related support activities; paper products; transportation equipment; nonmetallic mineral products and plastics \& rubber products (See Table 6).

### 3.0 Non-Manufacturing PMI Report

## Business Activity and New Orders/new business received growing at a slower rate, Employment declining at a faster rate and Raw Materials Inventories decreasing from expansion

The Composite PMI for the Non-Manufacturing sector contracted after seven consecutive months of expansion. At 49.6 percent, the index declined from the 51.9 percent in the preceding month. Of the eighteen non-manufacturing sub-sectors, ten reported decline in the month of November in the following order: construction; professional, scientific, \& technical services; accommodation \& food services; information \& communication; arts, entertainment \& recreation; real estate, rental \& leasing; finance \& insurance; public administration; utilities and management of companies. The educational services sub-sector reported no change. The remaining seven sub-sectors reported growth in the order: electricity, gas, steam and air conditioning supply; wholesale trade; agriculture; transportation \& warehousing; health care \& social assistance; water supply, sewage \& waste management and retail trade (See Table 7).

12 The composite PMI is a simple average of the following diffusion (series) indices: business activity, new orders, employment level and inventories.

Fig. 3: Trend of Non-Manufacturing PMI

### 3.1 Business Activity

Business Activity grew for the eighth consecutive month, as the index stood at 52.9 points in November, 2015. The index grew at a slower rate, compared to its level in the preceding
month. Of the eighteen non-manufacturing sub-sectors, nine of them reported growth in November in the following order: electricity, gas, steam \& air conditioning supply; utilities; agriculture; health care \& social assistance; retail trade; wholesale trade; water supply, sewage \& waste management; transportation \& warehousing and arts, entertainment \& recreation. Two sub-sectors namely, information \& communication and management of companies reported no change. The remaining seven sub-sectors contracted in the review month in the order: real estate, rental \& leasing; public administration; accommodation \& food services; construction; professional, scientific \& technical services; finance \& insurance and educational services (See Table 8).
