## A Quarterly Publication of the Central Bank of Nigeria

3rd Quarter, 2017

## 1.0 Highlights

The highlights of the  $Q_3$  2017 Consumer Expectations Survey (CES) are as follows:

- Overall outlook of consumers further moderated in the current quarter, though still down beat. This was attributable to an anticipated consumer confidence in the economy and a moderation in net household income. Consumers however, had a positive outlook for the next quarter and the next 12 months.
- On average, more households nationwide expect some increase in their expenditure on basic commodities and services in the next 12 months. Consumers expect to spend substantial amounts of their income on food and other household needs, education, savings, medical expenses, purchase of consumer durables, and debt payment.
- Majority of consumers nationwide believe that the next 12 months would not be an ideal time to purchase big-ticket items like motor vehicle and house & lot.
- Most respondents expected that borrowing rate will fall, naira will appreciate, while inflation and unemployment rates will rise in the next 12 months
- The major drivers of the expected upward movement in prices are: education, house rent, medical care, transport and electricity.

#### 2.0 Introduction

The Consumer Expectations Survey (CES) for Q<sub>3</sub> 2017 was conducted during the period August 21 to September 1, 2017, covering a sample size of 1,950 households drawn from the National Bureau of Statistics (NBS) Master List of Households.

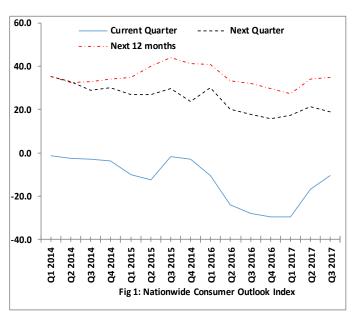

The overall response rate for the  $Q_3$  2017 CES was 98.8 per cent. Respondents' distribution by educational attainment showed that 41.8 per cent had university education, 29.7 per cent had higher non-university education, while 18.0 per cent had senior secondary school education. Respondents with junior secondary and primary school education accounted for 5.8 and 2.8 per cent, respectively, while those with no formal education accounted for the balance of 1.9 per cent.

#### 3.0 Consumer Outlook

## 3.1 Consumer Overall Confidence Index

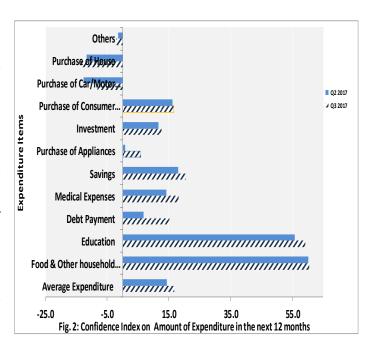

The consumers' overall confidence outlook moderated in  $Q_3$  2017 while still remaining down beat. Though the index was negative at -10.5, more respondents were optimistic about the economy when compared with the corresponding quarter of 2016. Some respondents attributed this moderation in outlook to improvement in their family net income, while more

ascribed the development to increased confidence in the economy, when compared with the corresponding period of 2016. The consumer outlook for the next quarter and next 12 months were however, positive at 19.0 and 34.8 points, respectively (Fig. 1). This outlook could be attributed to the anticipated improvement in Nigeria's economic conditions. expected increase in net household income, and expectations to save a bit and/or have plenty over savings in the next 12 months (Table 1).

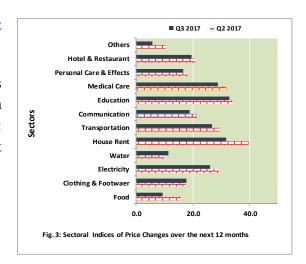

## 3.2 Expenditure Outlook in the Next 12 Months

With an average index of 16.8 points, more households nationwide increase expect an in expenditure on basic commodities and services in the next 12 months (Table 1). Most of the consumers expect to spend a substantial amount of their income on food and other household needs, education, savings, medical expenses, purchase durables, and debt consumer payment. However, they do not plan to expend on large ticket items such as purchases of house and car/motor vehicle (Fig. 2).

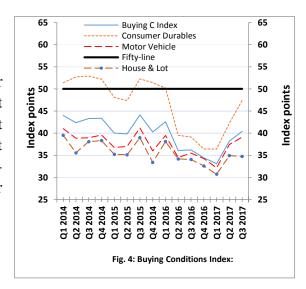

# 3.2.1 Outlook on Price Changes in the Next 12 Months

Most respondents expect the prices of goods and services to rise in the next 12 months with an index point of 20.4. The major drivers are: Education, house rent, medical care, transport and electricity (Fig. 3).

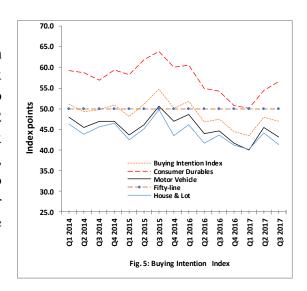

## 3.2.2 Buying Outlook

The **overall buying conditions** index for consumers in the current quarter for big-ticket items stood at 40.4 points. This indicates that majority of consumers believed that the current quarter was not the ideal time to purchase big-ticket items like consumer durables, motor vehicles, and house & lot (Fig 4).

Similarly, **overall buying intention** index in the next twelve months stood at 47.0 index points, indicating that majority of consumers do not intend to buy these items in the next 12 months. However, the buying intention index for consumer durables was above 50 points, indicating that respondents have plans to purchase furniture, gas cooker, refrigerator, air conditioner, television and other durables in the next twelve months (Fig 5).

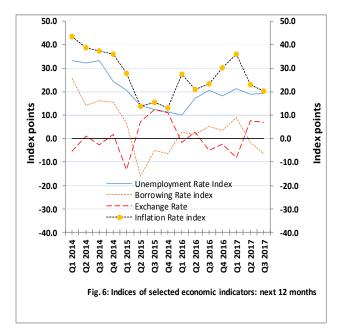

# 3.3 Borrowing and Exchange Rates Outlook

With indices of -6.4 and 7.0 points, consumers expect borrowing rate to fall and Naira to appreciate in the next 12 months (Fig. 6).

# 3.4 Unemployment Outlook

The unemployment index for the next 12 months remained positive at 19.2 points in  $Q_3$  2017, indicating that majority of the consumers expect unemployment to rise in the next 12 months (Fig. 6).

#### **TECHNICAL NOTES**

- 1. The Overall consumer confidence index is computed as the average of the three indices, namely: Economic Condition, Family Financial Situation and Family Income.
  - a. Economic Condition refers to the perception of the respondent regarding the general economic condition of the country.
  - b. Family Financial Situation refers to the level of savings, investments, other assets including cash at hand and outstanding debts.
  - c. Family Income includes primary income and receipts from other sources received by all family members as participants in any economic activity or as recipients of transfers, pensions, grants, and the like.
- 2. The confidence index or diffusion index is computed as the percentage share of respondents that answered in the affirmative less the percentage share of respondents that answered negative in a given indicator.
- 3. A positive CI indicates that respondents with a favorable view outnumber those with an unfavorable view, except for unemployment, change in prices and interest rate for borrowing money, where a positive CI indicates the opposite.
- 4. Buying condition and buying intention indices refer to the assessment of consumers as to whether it is good time, neither good nor bad or bad time to buy assets (i.e. consumer durables, house and lot, and motor vehicles) during the quarter. An index above 50 means more respondents indicated that it is a good time to buy assets; below 50 means more respondents believe that it would not be an appropriate time to make those purchases; and 50 means the number of respondents on both sides is equal.

BCI = 0.5(100+DI), where DI = diffusion index
