# Central Bank of Nigeria 

Purchasing Managers' Index (PMI) Survey Report

Statistics Department
September 2018

## PURCHASING MANAGERS' INDEX (PMI) SEPTEMBER 2018 REPORT

### 1.0 Introduction

The September 2018 PMI survey was conducted by the Statistics Department of the Central Bank of Nigeria during the period September 10-17, 2018. The respondents were purchasing and supply executives of manufacturing and non-manufacturing organizations in all 36 states in Nigeria and the Federal Capital Territory (FCT) (Fig. 1). The Bank makes no representation regarding the individual companies, other than the information they have provided. The data contained herein further provides input for policy decisions.

Fig. 1: Map of Nigeria Showing the 36 States and the FCT

### 1.1 Data and Method of Presentation

The Manufacturing and Non-Manufacturing PMI Report on businesses is based on survey responses, indicating the changes in the level of business activities in the current month compared with the preceding month. For each of the indicators measured, this report shows the diffusion index of the responses. The diffusion index is computed as the percentage of responses with positive change plus half of the percentage of those reporting no change, except for supplier delivery time, which is computed as the percentage of responses with negative change plus half of the percentage of those reporting no change. The composite PMI for the manufacturing sector is computed as the weighted average of five diffusion indices, namely: production level, level of new orders, suppliers' delivery time, employment level and raw materials inventory/work in progress, with assigned weights of $25 \%$, $30 \%, 15 \%, 10 \%$ and $20 \%$, respectively. The composite PMI for the non-manufacturing sector is
computed from four diffusion indices, namely: business activity, level of new orders, employment level and raw materials inventory, with equal weights of $25 \%$ each.

A composite PMI above 50 points indicates that the manufacturing/non-manufacturing economy is generally expanding, 50 points indicates no change and below 50 points indicates that it is generally contracting. The subsectors reporting growth are listed in the order of highest to lowest growth, while those reporting contraction are listed in the order of the highest to the lowest contraction.

### 2.0 Manufacturing PMI Report

Production level, new orders employment level and inventories grew at a slower rate; supplier delivery time grew at a faster rate in September 2018

Fig. 2: Manufacturing PMI at a glance

The Manufacturing PMI in the month of September stood at 56.2 index points, indicating expansion in the manufacturing sector for the eighteenth consecutive month. (Fig. 3 and Table 1). The index however grew at a slower rate when compared to the index in the previous month. Of the 14 subsectors surveyed, 10 reported growth in the review month in the following order: Electrical equipment; Printing \& related support activities; Transportation equipment; Nonmetallic mineral products; Chemical \& pharmaceutical products; Fabricated metal products; Furniture \& related products; Textile, apparel, leather \& footwear; Food, beverage \& tobacco products; and Plastics \& rubber products. The Petroleum \& coal products; Cement; Paper products; and Primary metal subsectors declined in the review month.

### 2.1 Production Level

At 58.4 points, the production level index for the manufacturing sector grew for the nineteenth consecutive month in September 2018. The index indicated a slower growth in the current month, when compared to its level in the preceding month. Ten of the 14 manufacturing subsectors recorded increase in production level, 1 remained unchanged while 3 declined (Fig. 4 and Table 2).

### 2.2 New Orders

At 55.3 points, the new orders index grew for the eighteenth consecutive month, indicating increase in new orders in September 2018. Nine subsectors reported growth, 2 remained unchanged, while 3 contracted in the review month (Fig. 5 and Table 3).

Fig. 5: Trend of new orders index

### 2.3 Supplier Delivery Time

The manufacturing supplier delivery time index stood at 56.1 points in September 2018, indicating faster supplier delivery time for the sixteenth consecutive month. Eleven subsectors recorded improved suppliers' delivery time, 2 remained unchanged while 1 reported worsening delivery times (Fig. 6 and Table 4).

Fig. 6: Trend of supplier delivery time index

### 2.4 Employment Level

The employment level index in September 2018 stood at 54.9 points, indicating growth in employment level for the seventeenth consecutive month. Of the 14 subsectors, 12 reported increased employment level, 1 remained unchanged while 1 reported reduced employment level in the review month (Fig. 7 and Table 5).

### 2.5 Raw material Inventories

The Manufacturing sector inventories index grew for the eighteenth consecutive month in September 2018. At 55.9 points, the index grew at a slower rate when compared to its level in the previous month. Ten of the 14 subsectors recorded growth, while 4 recorded decline in raw material inventories (Fig. 8 and Table 6).

### 3.0 Non-Manufacturing PMI Report

Business activity, new orders, employment level and inventories grew at a slower rate in September 2018

Fig 7: Trend of manufacturing employment index

Fig. 8: Trend of raw material inventory index

Fig. 9: Non-Manufacturing PMI at a glance

The composite PMI for the nonmanufacturing sector stood at 56.5 points in September 2018, indicating expansion in the Nonmanufacturing PMI for the seventeenth consecutive month. The index grew at a slower rate when compared to that in August 2018. Fifteen of the 17 subsectors recorded growth in the following order: Educational services; Management of companies; Information \& communication;

Fig. 10: Trend of Non-manufacturing PMI Agriculture; Finance \& insurance; Water supply, sewage \& waste management; Wholesale/Retail trade; Real estate rental \& leasing; Utilities; Accommodation \& food services; Transportation \& warehousing; Electricity, gas, steam \& air conditioning supply; Professional, scientific, \& technical services; Health care \& social assistance; and Repair, Maintenance/Washing of Motor Vehicles. The Arts, Entertainment \& Recreation subsector remained unchanged, while construction subsector recorded contraction in the review period (Fig. 10 and Table 7).

### 3.1 Business Activity

At 58.1 points, the business activity index grew for the eighteenth consecutive month, indicating expansion in nonmanufacturing business activity in September 2018. The index grew at a slower rate when compared to its level in the previous month. Twelve subsectors recorded growth in business activity, 3 remained unchanged while 2 declined in the review month (Fig 11 Table $8)$.

### 3.2 New Orders

At 55.8 points, new orders index grew for the eighteenth consecutive month in September 2018. Of the 17 subsectors, 13 reported growth, 1 remained unchanged, while 3 recorded a decline (Fig 12 Table 9).

### 3.3 Employment Level

The employment level Index for the non-manufacturing sector stood at 55.4 points, indicating growth in employment for the seventeenth consecutive month. Thirteen subsectors recorded growth, 1 remained unchanged while 3 recorded decline in the review month (Fig 13 Table 10).

## $3.4 \quad$ Non-manufacturing Inventory

At 56.8 points, nonmanufacturing inventory index grew for the seventeenth consecutive month, indicating growth in inventories in the review period. Thirteen subsectors recorded higher inventories, subsector 1 remained unchanged while 3 declined in September 2018 (Fig 14 Table 11).

Fig. 13: Trend of non-manufacturing employment index

Fig. 14: Trend of non-manufacturing inventory index

## APPENDICES

Table 1: Manufacturing at a Glance

| Index | Series <br> Index* <br> August | Series <br> Index* <br> September | Difference | Direction | Rate of Change | Trend** <br> (Months) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Primary metal | 53.0 | 49.2 | -3.8 | Declining | From Expansion | 1 |
| Printing \& related support activities | 55.6 | 61.7 | 6.1 | Growing | Faster | 6 |
| Textile, apparel, leather \& footwear | 60.3 | 57.1 | -3.2 | Growing | Slower | 19 |
| Transportation equipment | 49.5 | 61.7 | 12.2 | Growing | From Contraction | 1 |

$\backslash 1$ The composite PMI is a weighted average of the following diffusion indices: production level, new orders, supplier deliveries, employment level and inventories. The weights assigned to these variables are $25 \%, 30 \%, 15 \%, 10 \%$ and $20 \%$ respectively.
*The series index is a diffusion index defined as a weighted percentage of high, same and low with $1.0,0.5$ and 0.0 as weights respectively.
