Business Expectations Survey

Q2 2014 North East Zone

Business Outlook

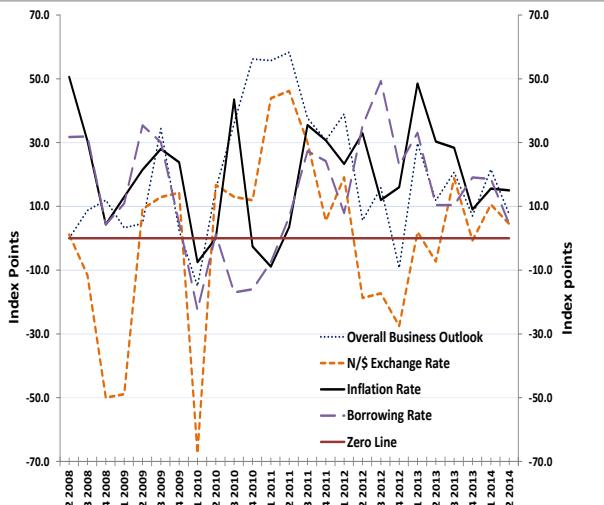

Fig.10a: North East Indices: Current Quarter

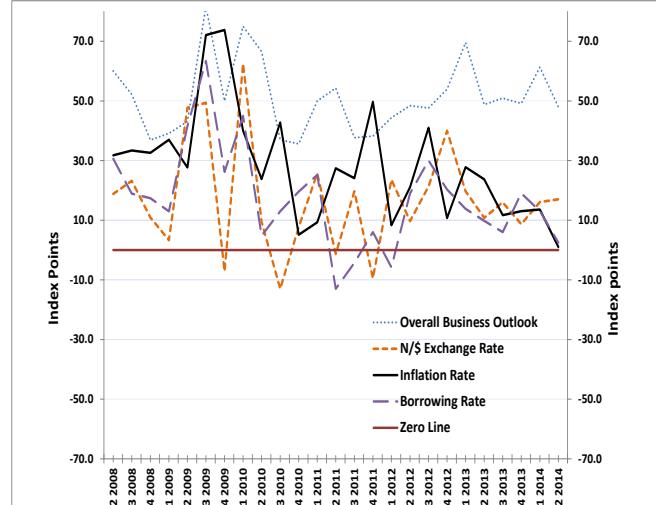

Fig.10b: North East Indices: Next Quarter

Respondents in the North East zone were less optimistic on business activities in the quarter under review. At 7.5 points overall confidence index dipped by 4.3 index points, compared with the level achieved in the corresponding quarter of 2013. However, respondents were more optimistic about business activities in the next quarter as the index will be expected to rise by 40.5 points above the level achieved in the current quarter (Fig. 10).

The optimism in the overall business outlook in the zone could be adduced to services (5.0 points) and construction (3.5 points) sectors. The optimism was however dampened by the wholesale and retail (-1.0 points), and industrial sector (-0.5 points) (Table 4 Sections 2 & 14).

The volume of total order and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, respondent optimism in access to credit by the firms upped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 27.5 points in the current quarter was driven by services (10.1 points), wholesale and retail (7.5 points), construction (6.0 points) and industrial sector (4.0 points) sectors (Table 4 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, financial problems, unfavourable political climate, unfavourable economic climate, competition and unclear economic laws as factors limiting the growth of business activities in the zone (Table 4 Section 8).

Respondent firms expect naira exchange rate to remain strong in the current and next quarters. Inflation and borrowing rates, are however expected to rise in both current and next quarters (Tables 4 Sections 9).

The respondent firms by type of business show that “neither importer nor exporter” category constituted the majority with 83.5 per cent, followed by “importer” with 11.0 per cent, and “both importer and exporter” 5.5 per cent (Table 4 Section 11).

At 17.9 points overall confidence index rose by 11.6 index points, compared with the level achieved in the corresponding quarter of 2013. Similarly, respondents were optimistic about business activities in the next quarter as the index will be expected to rise to 49.7 points from 17.9 points achieved in the current quarter (Fig. 11).

The optimism in the overall business outlook in the zone could be adduced to the contributions of services (11.5 points), wholesale and retail (3.5 points), industrial (1.8 points), and construction (1.2 points) (Table 5 Sections 2 & 14).

The volume of total order book and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, the optimism in access to credit by the firms upped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 15.0 points in the current quarter was driven by services (10.3 points), wholesale/retail sectors (1.8 points), industrial (1.5 points), and

construction sector (1.5 points). (Table 5 Sections 4 & 15).

Business Expectations Survey

Q2 2014 South South Zone

Business Outlook

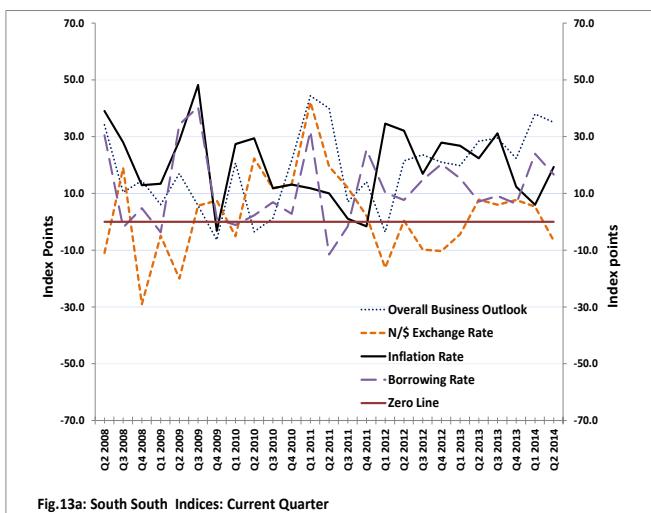

Fig.13a: South South Indices: Current Quarter

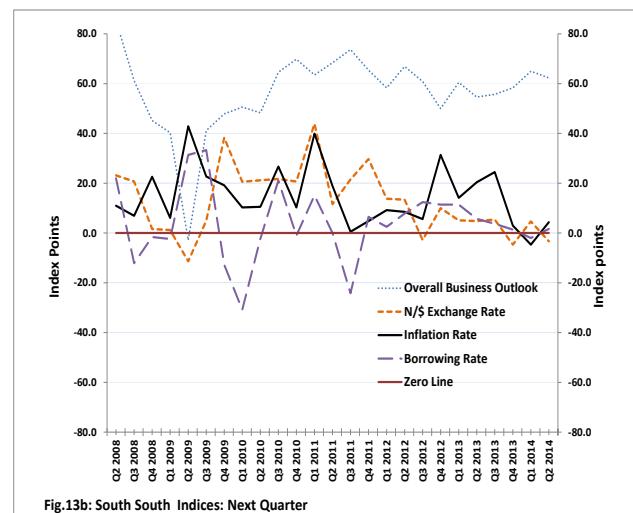

Fig.13b: South South Indices: Next Quarter

Respondents in the South South zone were optimistic on business activities in the quarter under review. At 35.0 points, the overall confidence index rose by 6.6 index points, above the level achieved in the corresponding quarter of 2013. Respondents were more optimistic about business activities in the next quarter as the index would be expected to rise to 62.3 points from the level achieved in the current quarter (Fig. 13).

The optimism in the overall business outlook in the zone could be adduced to the contributions of services (13.0 points), Industrial (12.3 points), wholesale/retail (5.7 points) and construction (4.0 points) (Table 7 Sections 2 & 14).

The volume of total order and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, the slight optimism in access to credit by the firms upped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 23.0 points in the current quarter was driven by industrial (10.0 points), services (9.3 points) and wholesale/retail trade (3.7 points) (Table 7 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, competition, financial problems, unfavourable economic climate, high interest rate, and access to credit climate as limiting factors to the growth of business activities (Table 7 Section 8).

Respondent firms expect naira exchange rate to depreciate in the current and next quarters. Similarly, inflation and borrowing rates are expected to rise in the current quarter and next quarters (Table 7 Sections 9 & 10).

The respondent firms by type of business show that “neither importer nor exporter” category constituted the majority with 76.3 per cent, followed by “importer” 13.3 per cent, “both importer and exporter” 7.3 per cent and “exporter” firms 3.0 per cent (Table 7 Section 11).

Respondents in the South West zone were more optimistic on business activities in the quarter under review. At 17.0 points, the overall confidence index rose by 2.7 index points, compared with the level achieved in the corresponding quarter of 2013. Respondents were more optimistic about business activities in the next quarter as the index would be expected to rise to 58.0 points from the level achieved in the current quarter (Fig. 14).

The optimism in the overall business outlook in the zone could be attributed to wholesale/retail (6.3 points), services (5.5 points), industrial (3.3 points) construction (2.0 points), and (Table 8 Sections 2 & 14).

The volume of total order and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, the optimism in access to credit by the firms upped their financial condition and average capacity utilization in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 24.8 points in the current quarter was driven by services (9.0 points), industrial (7.5 points) wholesale/retail trade (6.8 points) and

construction sector (1.5 points) (Table 8 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, competition, unfavourable economic climate, financial problems and high interest rate as limiting factors to the growth of business activities (Table 8 Section 8).
