Business Expectations Survey

Q3 2014 North East Zone

Business Outlook

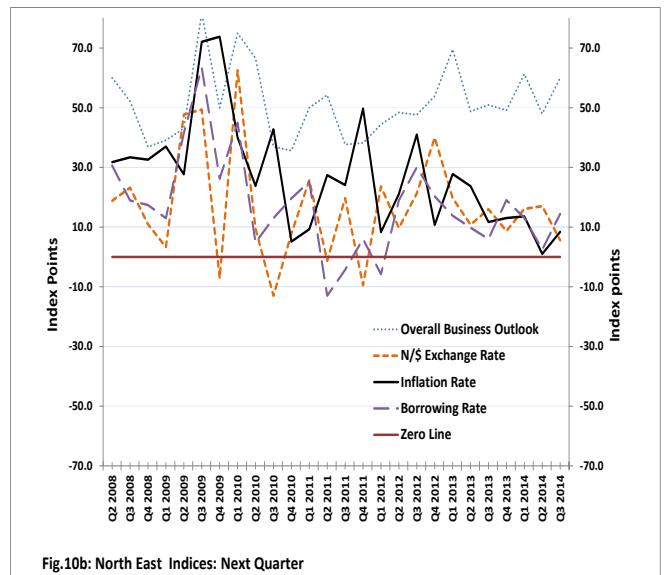

Respondents in the North East zone were less optimistic on business activities in the quarter under review. At 18.8 points overall confidence index dipped by 1.9 index points, compared with the level achieved in the corresponding quarter of 2013. However, respondents were more optimistic about business activities in the next quarter as the index will be expected to rise by 41.2 points above the level achieved in the current quarter (Fig. 10).

The optimism in the overall business outlook in the zone could be adduced to services (9.6 points), wholesale and retail (8.0 points) and industrial (2.8 points) sectors. The optimism was however dampened by the construction sector (-1.6 points) (Table 4 Sections 2 & 14).

The volume of total order and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, respondent optimism in access to credit by the firms upped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 27.6 points in the current quarter was driven by services (12.4 points), wholesale and retail (6.8 points), industrial (4.4 points) and construction sector (4.0 points) sectors (Table 4 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, financial problems, unfavourable political climate, unfavourable economic climate, competition and unclear economic laws as factors limiting the growth of business activities in the zone (Table 4 Section 8).

Respondent firms expect naira exchange rate to depreciate in the current quarter, but appreciate in the next quarters. Inflation and borrowing rates, are however expected to rise in both current and next quarters (Tables 4 Sections 9).

The respondent firms by type of business show that “neither importer nor exporter” category constituted the majority with 86.0 per cent, followed by “importer” with 10.0 per cent, and “both importer and exporter” 4.0 per cent (Table 4 Section 11).

Business Expectations Survey

Q3 2014 South East Zone

Business Outlook

Respondents in the South East zone were less optimistic on business activities in the quarter under review. At 10.1 points, the overall confidence index dipped by 4.7 index points, compared with the level achieved in the corresponding quarter of 2013. Similarly, respondents were more optimistic about business activities in the next quarter as the index would be expected to rise to 44.8 points from the level achieved in the current quarter (Fig. 12).

The optimism in the overall business outlook in the zone could be adduced to the contributions of services (7.7 points), industrial (2.8 points) and construction (0.8 points) (Table 6 Sections 2 & 14).

The volume of total order book and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. Similarly, the optimism in access to credit by the firms upped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 7.7 points in the current quarter was driven by services (6.5 points) and construction (1.2 points) (Table 6 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, high interest rate, financial problems, access to credit , unfavourable economic climate and unclear economic laws as limiting factors to the growth of business activities (Table 6 Section 8).

Respondent firms expect naira exchange rate to remain strong in the current quarter and the next quarter. However, while a rise in inflation rate is expected in the current and next quarters, a fall in borrowing rate is expected in both quarters (Table 6 Section 9 & 10).

The respondent firms by type of business show that “neither importer nor exporter” category constituted the majority with 68.8 per cent, followed by “importer” 24.7 per cent, “both importer and exporter” 5.7 per cent, and “Exporter” 0.8 per cent (Table 6 Section 11).

Business Expectations Survey

Q3 2014 South South Zone

Business Outlook

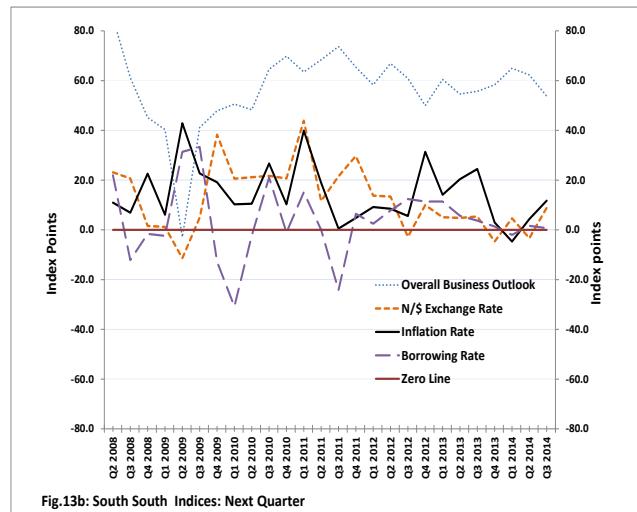

Respondents in the South South zone were less optimistic on business activities in the quarter under review. At 17.8 points, the overall confidence index dipped by 11.7 index points, above the level achieved in the corresponding quarter of 2013. Respondents were more optimistic about business activities in the next quarter as the index would be expected to rise to 53.7 points from the level achieved in the current quarter (Fig. 13).

The optimism in the overall business outlook in the zone could be adduced to the contributions of services (7.1 points), Industrial (4.3 points), wholesale/retail (4.3 points) and construction (2.1 points) (Table 7 Sections 2 & 14).

The volume of total order and financial condition of the firms in the zone, buoyed the volume of business activity in the current quarter. However, respondent pessimism in access to credit by the firms damped their financial condition in the review quarter.

The financial condition (or internal liquidity position) of the firms which stood at 21.4 points in the current quarter was driven by industrial (7.5 points), wholesale/retail trade (7.5 points) services (6.0 points) and construction (0.4 points) (Table 7 Sections 4 & 15).

Respondents in the zone cited insufficient power supply, competition, unfavourable economic climate, high interest rate, financial problems, and access to credit as limiting factors to the growth of business activities (Table 7 Section 8).

Respondent firms expect naira exchange rate to appreciate in the current and next quarters. Similarly, inflation and borrowing rates are expected to rise in the current quarter and next quarters (Table 7 Sections 9 & 10).

The respondent firms by type of business show that “neither importer nor exporter” category constituted the majority with 69.0 per cent, followed by “importer” 16.0 per cent, “both importer and exporter” 13.5 per cent and “exporter” firms 1.4 per cent (Table 7 Section 11).
