EXECUTIVE SUMMARY

The Q3 2015 Consumer Expectations Survey (CES) was conducted during the period 3rd to 15th August, 2015. The sample size was 1,900 households, drawn from the National Bureau of Statistics (NBS) Master Sample List of Households, which is considered a representative sample of households nationwide. A response rate of 98.9 per cent was achieved.

The highlights of the CES report are as follows:

- Overall outlook of consumers in Q3, 2015 remained downbeat. This could be attributable to the bleak outlook of consumers as they anticipated drawing down on their savings or getting into debt .
- Consumers were however optimistic on their outlook in the next quarter and the next 12 months. The optimism could be attributable largely to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings to meet other financial obligations.
- Respondents' bleak outlook on the family financial situation in the current quarter, was pessimistic across all income groups .
- On average, more households nationwide expect some increase in their expenditure on basic commodities and services in the next 12 months. The consumers expect to spend substantial amounts of their income on education, food and other household needs, savings, investment and purchase of consumer durables, but do not plan to spend much of their income on purchase of house and purchase of car/motor vehicle .
- Majority of consumers nationwide believed that the next 12 months would be an ideal time to purchase big-ticket items like consumer durables and motor vehicle, but would not be an ideal time to purchase house & lot.
- Most consumers expect inflation rate to rise in the next 12 months. The major drivers of the expected upward movement in prices were house rent, education, food and medical care.
- Majority of the consumers nationwide expect unemployment to rise in the next 12 months as the index stood at 12.5 points. At -5.1 and 12.4 points, they also expect borrowing rate to fall but naira exchange rate to weaken in the next 12 months.

the
Survey*

*Response rate for Q3,
2015 was 98.9 per
cent.*

Consumer Expectations Survey Q3, 2015

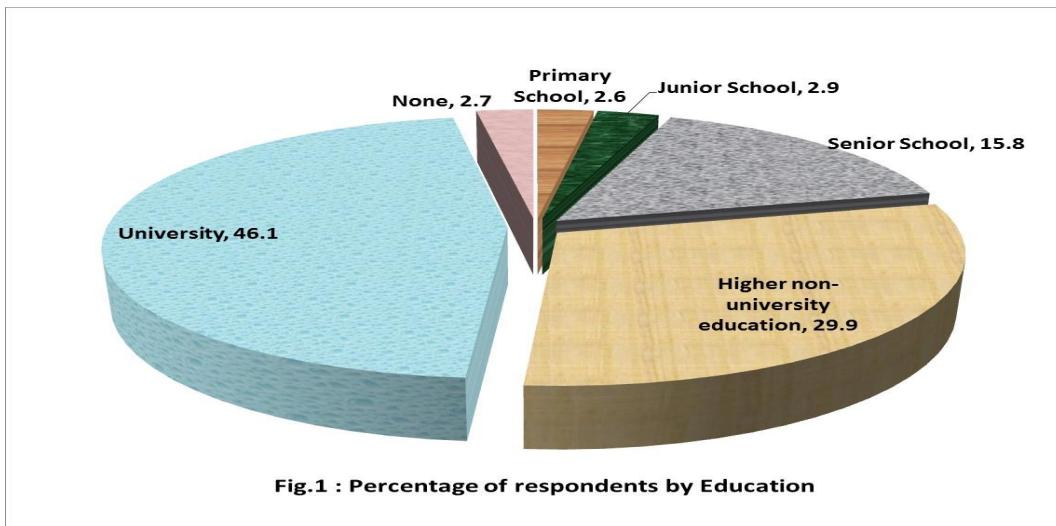

The nationwide Consumer Expectations Survey (CES) for Q3, 2015 was conducted during August 3-15, 2015 covering a total sample size of 1,900 households drawn from the National Bureau of Statistics (NBS) Master Sample List of Households, which is considered a good representative sample of households nationwide. The states covered, the sample size distribution and response rates achieved are as shown in the Table 1 below, while the location of all the states in the federation and the Federal Capital Territory (FCT) covered are shown in the Map of Nigeria below.

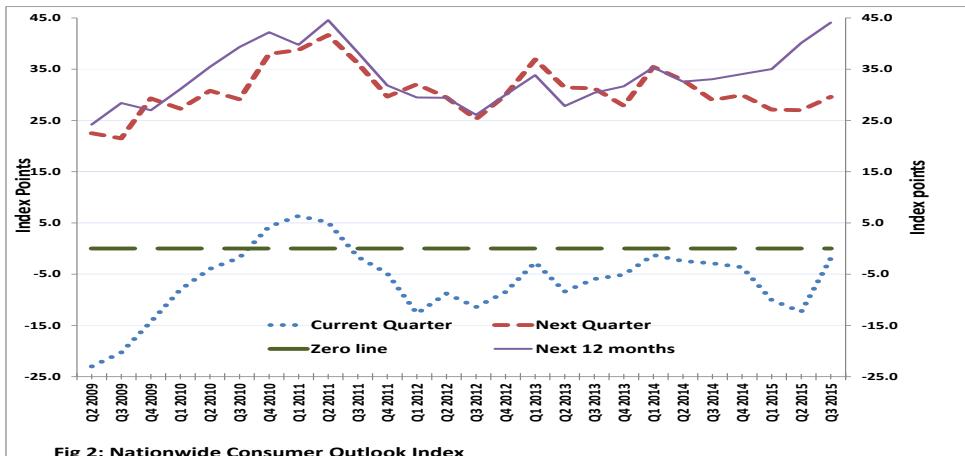

Table 1: The distribution of sample size and response rate

ZONE	SAMPLE STATE	Q3 2015 SAMPLE SIZE	Q3 2015 RESPONSES	RESPONSE RATE
North Central	Niger, Kwara, Abuja, Benue, Kogi, Nasarawa and Plateau	350	337	96.3
North East	Bauchi, Adamawa, Gombe, and Taraba	250	250	100.0
North West	Kaduna, Katsina, Kano, Zamfara, Jigawa, Sokoto and Kebbi	350	350	100.0
South East	Enugu, Imo, Ebonyi, Anambra and Abia	250	250	100.0
South South	Edo, Delta, Rivers, Bayelsa, Cross River and Akwa-Ibom	300	293	97.7
South West	Lagos, Oyo, Ekiti, Ogun, Osun and Ondo	400	400	100.0
TOTAL		1900	1880	98.9

The overall response rate for the Q3, 2015 CES survey was 98.9 per cent nationwide, which was 0.4 percentage point lower than what was achieved in the previous quarter. The response rate by educational attainment showed that 46.1 per cent had university education, 29.9 per cent had higher non-university education, while 15.8 per cent was for those with senior school education. Respondents with primary and junior school education accounted for 2.6 and 2.9 per cent, respectively; while those with no educational background were 2.7 per cent.

Nationwide Consumer Outlook

Consumers' Overall Outlook

Consumer overall outlook in Q3 2015 remained consistently downbeat since Q3 2011.

Consumers' overall outlook¹ in Q3, 2015 remained consistently downbeat since Q3 2011. At -1.9 index points, it rose by 1.0 points above the level achieved in the corresponding quarter of 2014. The bleak outlook of consumers in the quarter under review, could be attributable to the anticipation of drawing down on their savings or getting into debt (Table 2 section 2). Consumer outlook for the next quarter and next 12 month was however positive, at 29.6 and 44.1 points, respectively. The positive outlook of consumers in the next quarter could be attributable largely to the relative improvement of Nigeria's economic conditions, expected increase in consumers total net household income and expectations to save a bit and/or have plenty over savings (Table 2 section 3).

¹The overall consumer confidence index is determined by the average of three (3) measures, namely, the outlook on macroeconomic conditions, family financial situation and family income.

All the income groups opined that the family financial situation was getting worse as they anticipate drawing down on their savings or getting into debt.

Consumer Outlook Indices: Current Quarter

Consumers views were captured across three dimensions, namely: - the economic condition, family financial situation and family income. While consumers expressed optimism in the general economic condition and family income in the current quarter they expressed pessimism in the family financial situation. All the income groups opined that the family financial situation was getting worse as they anticipate drawing down on their savings or getting into debt.

Consumer Outlook Indices: Next Quarter and the Next 12 months

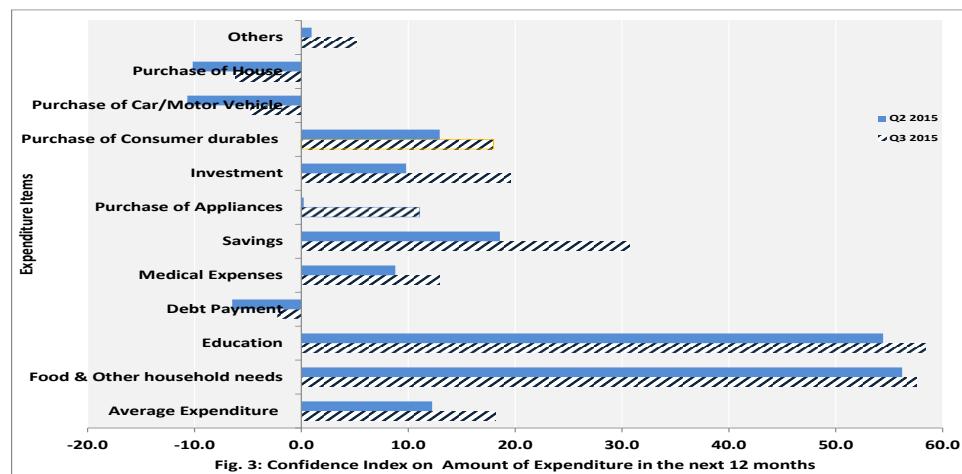

At 29.6 and 44.1 points, the overall consumers confidence index in the next quarter and the next 12 months, respectively, was expected to be better than their outlooks in the current quarter. In the next quarter and the next twelve months, consumers expect the general economic condition in the country and their total net household income to be much better and would consequently be expected to save a bit and/or have plenty after savings (Table 2 sections 3 & 4).

Expenditures in the Next 12 Months

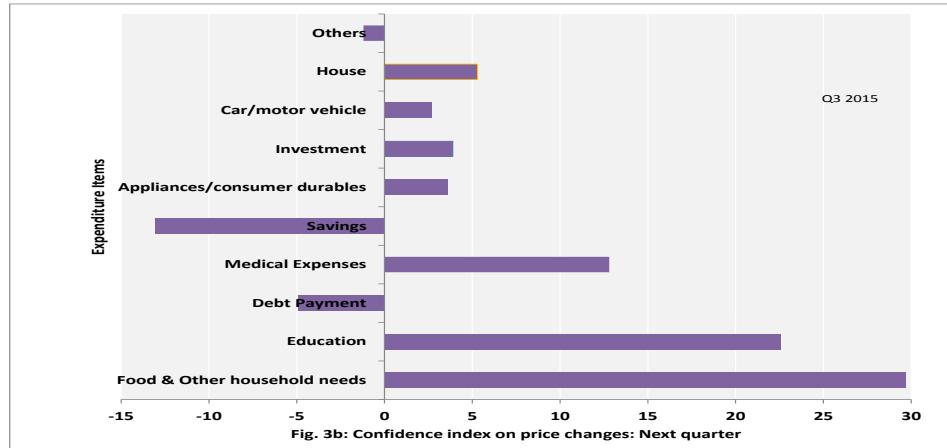

Majority of consumers nationwide expect to spend substantial amount of their income on education, food and other household needs, savings, purchase of consumer durables, purchase of car/motor vehicle and investment in the next 12 months.

On the average, more households nationwide expect some increase in their expenditure on basic commodities and services in the next 12 months. With an average index of 18.2 per cent expected, the index rose by 3.1 points from 15.1 points recorded in the corresponding quarter of 2014 (Table 2 section 5).

The majority of consumers nationwide expect to spend substantial amount of their income on education, food and other household needs, savings, purchase of consumer durables, purchase of car/motor vehicle and investment in the next 12 months. On the other hand, they do not plan to spend substantial amount of their income on large ticket items such as purchases of car/motor vehicle and house. These results conform with the National Household Expenditure Survey which showed that majority of households spend substantial amount of their income to meet basic needs and have little left for long term investment (Fig. 3).

Most consumers nationwide expect the prices of food, education, medical expenses and other household needs to rise in the next quarter.

Most consumers nationwide expect the prices of the following expenditure items: House rent, education, food and other household needs, medical care, hotel & restaurant and clothing & footwear to rise in the next quarter. On the other hand, prices of water was expected to fall. Based on this outlook, government and/or monetary authority would be expected to take appropriate measures to dampen the impact of these inflationary expectations on the economy (Fig. 3b)

Buying Conditions²

The overall buying conditions index for consumer in the current quarter for big-ticket items stood at 44.1 per cent. This indicates that the majority of consumers nationwide, believed that the current quarter was not the ideal time to purchase big-ticket items like motor vehicles and house & lot. .

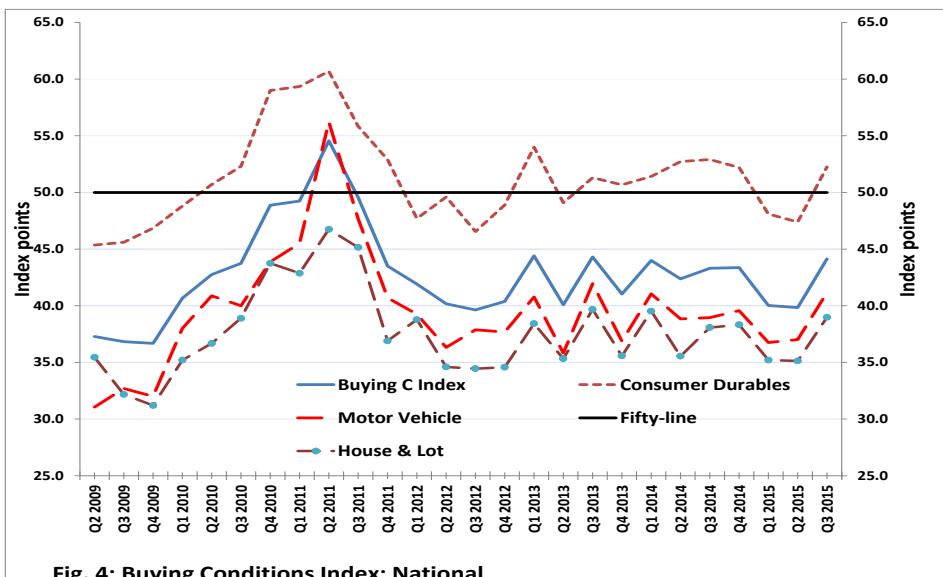

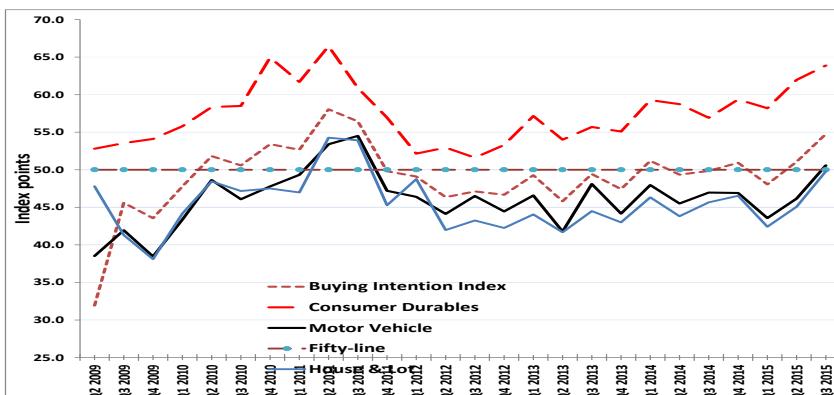

Fig. 4: Buying Conditions Index: National

² Buying condition refers to the assessment of consumers as to whether it is good time, neither good nor bad or bad time to buy assets (ie. consumer durables, house and lot, and motor vehicles) during the quarter. An index above 50 means more respondents indicated that it is a good time to buy assets; below 50 means more respondents believe that it would not be an opportune time to make purchases; and 50 means the number of respondents on both sides is equal. $BCI = 0.5(100+DI)$, where DI = diffusion index

Majority of consumers nationwide, believed that the next 12 months would be an ideal time to purchase consumer durables.

Majority of the consumers nationwide expect unemployment to rise in the next 12 months.

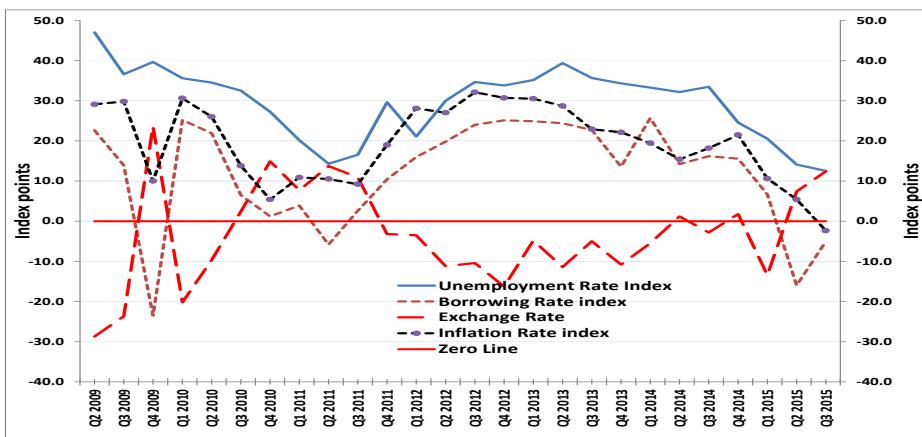

Buying Intentions⁴ in the Next 12 Months

The buying intention index for consumer durables such as furniture, gas cooker, refrigerator, air conditioner, television and other durables in the next twelve months rose to 63.9 index points from 56.9 points in Q3, 2014, suggesting that the majority of consumers nationwide, believed that the next 12 months would be an ideal time to purchase the consumer durables. Similarly, the buying intention index for the big-ticket items like house & lot and motor vehicles were above 50 points, indicating that the next twelve months would be an ideal time to purchase these items.

Indices of Selected Economic Indicators

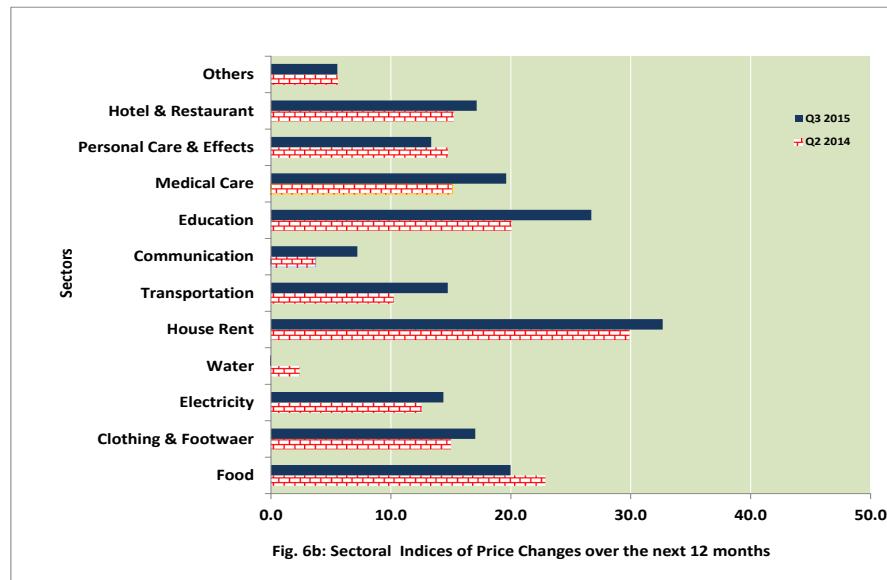

Majority of the consumers nationwide expect unemployment to rise in the next 12 months. The unemployment index for the next 12 months obtained in Q3, 2015 remained positive at 12.5 points compared with the 33.5 points in Q3, 2014. With indices of -5.1 and 12.4 points, consumers expect borrowing rate to fall but exchange rate to depreciate in the next 12 months.

⁴ Buying intention refers to the assessment of consumers as to whether it is good time, neither good nor bad or bad time to buy assets (ie. consumer durables, house and lot, and motor vehicles) during the next 12 months. An index above 50 means more respondents indicated that it is a good time to buy assets; below 50 means more respondents believe that it would not be an opportune time to make purchases; and 50 means the number of respondents on both sides is equal. $BI = 0.5(100+DI)$, where $DI = \text{diffusion index}$

*The major drivers
of the expected
upward movement
in prices were
house rent,
education, food and
medical care*

Majority of consumers expect inflation rate to rise in the next 12 months as the index stood at 2.3 points. The major drivers of the expected upward movement in prices were house rent, education, food and medical care (Table 2 section 9).

TECHNICAL NOTES

The overall consumer confidence index is computed as the average of the three indices, namely:

1. **Economic Condition** refers to the perception of the respondent regarding the general economic condition of the country.
2. **Family Financial Situation** refers to the level of savings, investments, other assets including cash at hand and outstanding debts.
3. **Family Income** includes primary income and receipts from other sources received by all family members as participants in any economic activity or as recipients of transfers, pensions, grants, and the like.

The **confidence index** or **diffusion index** is computed as the percentage share of respondents that answered in the affirmative less the percentage share of respondents that answered negative in a given indicator. A positive CI indicates that respondents with a favorable view outnumber those with an unfavorable view, except for unemployment, change in prices and interest rate for borrowing money, where a positive CI indicates the opposite.

Buying condition and buying intention indices refer to the assessment of consumers as to whether it is good time, neither good nor bad or bad time to buy assets (i.e. consumer durables, house and lot, and motor vehicles) during the quarter. An index above 50 means more respondents indicated that it is a good time to buy assets; below 50 means more respondents believe that it would not be an appropriate time to make purchases; and 50 means the number of respondents on both sides is equal.

$BCI = 0.5(100+DI)$, where DI = diffusion index.

Consumer Expectations Survey
Q3 2015, North Central Zone

Consumer Outlook

The North Central zone consumers' overall outlook was downbeat in Q3 2015. At -5.5 points, the index declined by -1.2 points below its level in the corresponding quarter of 2014. The negative outlook of consumers in the quarter under review, could be attributable to the deteriorating total net household income and drawdown on their savings or their getting into debt (Table 3 section 2).

However, consumer outlook for the next quarter and next 12 months remained positive, at 32.4 and 44.6 points respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings to meet other financial obligations.

On average, more households in the zone expect a decline in their expected expenditure on basic commodities and services in the next 12 months. With an average index of 16.2 points, the index dropped by 1.0 points from the 15.2 points obtained in the Q3, 2014 (Table 5 section 5 and Fig. 7).

The breakdown of the expected consumer expenditure over the next 12 months was: food and other household needs, savings, education, investment, and purchase of consumer durables. However, respondents do not intend to spend substantial amount of their income on purchase of car/ motor vehicle, medical expenses, and purchase of house.

The proportion of respondents that indicated intentions to buy big tickets items in the next 12 months rose to 52.4 points from the 48.5 points obtained in Q3, 2014. The buying intention index suggests that the next 12 months would be an opportune time to purchase consumer durables.

Consumer Outlook

Consumers' overall outlook in the North East zone remained upbeat in the current quarter. At 6.0 points, the index rose by 14.5 points from its level in Q3, 2014. The positive outlook of consumers in the quarter under review, could be attributable to the improved economic condition in the region, and their anticipation of increased total net household income (Table 4 section 2).

Consumer outlook for the next quarter and next 12 months were positive at 28.3 and 52.5 points, respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings and meet other financial obligations.

On average, more households in the zone expect an increase in their expected expenditure on basic commodities and services in the next 12 months. With an average index of 14.3 points, the index rose by 3.8 points, from the 10.5 points obtained in the corresponding period of 2014 (Table 4 section 5 and Fig. 8).

The breakdowns of the expected expenditure over the next 12 months are: food and other households needs, education, medical expenses, savings and purchase of consumer durables. Some consumers indicated that they do not plan to spend substantial amount of their income on debt payment, purchase of cars/motor vehicle, house and other appliances.

The proportion of respondents that indicated intentions to buy big ticket items in the next 12 months further rose to 57.4 points from the 42.4 points obtained in Q3, 2014. The buying intention index suggests that the next 12 months would be an opportune time to purchase consumer durables, and motor vehicle .

Consumer Outlook

The North West zone consumers' overall outlook in Q3, 2015 was upbeat. At 7.2 points, the index rose by 8.9 points above its level in Q3, 2014. The positive outlook of consumers in the quarter under review, could be attributable to the improving economic condition in the region, and their increasing total net household income (Table 5 section 2).

Consumer outlook for the next quarter and the next 12 months were positive at 23.5 and 50.3 points, respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, and anticipated increase in their total net household income which could lead to increased savings and meet other financial obligations.

On average, more households in the zone expect an increase in their expected expenditure on basic commodities and services in the next 12 months. With an average index of 24.1 points, the index dipped by 0.3 points from the 24.4 points obtained in the Q3, 2014 (Table 5 section 5 and Fig. 9).

The breakdown of the expected expenditure over the next 12 months was: education, food and other household needs, education, medical expenses, savings, purchase of appliances, investment and purchase of consumer durables.

The proportion of respondents that indicated intentions to buy big tickets items in the next 12 months rose to 56.9 points in the current quarter. The buying intention index suggests that the next 12 months would be an opportune time to purchase consumer durables and house and lot.

CONSUMER EXPECTATIONS SURVEY

Consumer Expectations Survey
Q3 2015, South East Zone

Consumer Outlook

The South East zone consumer's overall outlook was downbeat in Q3, 2015. At -13.2 points the index dipped by 11.3 points below its level in Q3, 2014. The negative outlook of consumers in the quarter under review, could be attributable to the worsening economic condition in the region , declines in their total net household income which led to a drawdown on their savings or their getting into debt (Table 6 section 2).

However, consumer outlook for the next quarter and the next 12 months were positive at 27.6 and 30.6 points, respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings and their ability to meet other financial obligations.

On average, more households in the zone expect an increase in their expected expenditure on basic commodities and services in the next 12 months. With an average index of 28.8 points, the index rose by 8.1 points, from the 10.7 points obtained in Q3, 2014 (Table 6 section 5 and Fig. 10).

The breakdown of the expected expenditure over the next 12 months was: education, food and other household needs, savings, purchase of appliances and purchase of consumer durables.

The proportion of respondents that indicated intentions to buy big tickets items in the next 12 months rose to 50.5 points from the 43.1 points obtained in Q3, 2014. The buying intention index suggests that the next 12 months would be an opportune time to purchase consumer durables.

Consumer Expectations Survey
Q3 2015, South-South Zone

Consumer Outlook

Consumers' overall outlook in the South South zone in Q3 2015 was downbeat at -8.1 points. The index fell by 8.9 points below its levels in Q3, 2014. The negative outlook of consumers in the quarter under review, could be attributable to the worsening economic condition in the region, their deteriorating total net household income and drawdown on their savings or getting into debt (Table 7 section 2).

However, consumer outlook for the next quarter and the next 12 months were optimistic at 26.6 and 33.5 points, respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings and meet other financial obligations.

On average, households in the zone expect an increase in their expected expenditure on basic commodities and services in the next 12 months. At 13.8 points, the index fell by 1.6 points from the 12.2 points achieved in the corresponding quarter a year ago (Table 7 section 5 and Fig. 11).

The breakdown of the expected expenditure over the next 12 months was: food and other household needs, education, savings, investment and other expenses. Some of the consumers indicated that they do not plan to spend substantial amount of their income on purchase of house and purchase of car/motor vehicle.

The proportion of respondents that indicated intentions to buy big tickets items in the next 12 months fell to 44.2 points from the 52.9 points obtained in Q3, 2014. The buying intention index suggests that the next 12 months would not be an opportune time to purchase motor vehicle and house & lot.

Consumer Expectations Survey
Q3 2015, South West Zone

Consumer Outlook

The South West zone consumers' overall confidence index in Q3, 2015 was zero. However, the index rose by 2.5 points above the level in Q3, 2014. The outlook of consumers in the quarter under review, could be attributable to the improved total net household income (Table 8 section 2 and Fig. 12).

Consumer outlook for the next quarter and the next 12 months was positive at 36.7 and 50.0 points, respectively. The positive outlook of consumers in the next quarter and the next 12 months could be attributable to the expectation of improved economic condition in the region, anticipated increase in their total net household income which could lead to increased savings and meet other financial obligations.

On average, more households in the zone expect an increase in their expenditure on basic commodities and services in the next 12 months. With an average index of 22.6 points, the index rose by 8.0 points from the 14.6 points obtained in Q3, 2014 (Table 8 section 5 and Fig. 12).

The breakdown of the expected expenditure over the next 12 months was: food and other household needs, education, savings, purchase of consumer durables and investment. Some consumers indicated that they do not plan to spend substantial amount of their income on debt payment and medical expenses.

The proportion of respondents that indicated intentions to buy big tickets items in the next 12 months rose to 63.6 points from the 57.7 points obtained in Q3, 2014. The buying intention index suggests that the next 12 months would be an opportune time to purchase consumer durables, motor vehicles and house & lot.
