CENTRAL BANK OF NIGERIA

REPORT OF THE BOARD OF DIRECTORS

Introduction

We present the state of affairs of the Central Bank of Nigeria (the 'Bank') and its subsidiaries (together the 'Group') as at 31 December 2024, the results and cash flows of the Group and the Bank in accordance with the accounting policies set out on pages 27 to 78 which are derived from the IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), the recommended practices in the guidelines issued February 2018, revised for reporting period up to 31 December 2024 by the Financial Reporting Council of Nigeria (FRC), titled "Revised Accounting Guideline for Financial Reporting by the Central Bank of Nigeria" (the Guideline) as it affects Central Bank of Nigeria operations, the CBN Act of 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023.

Results

The Group and Bank's (loss)/profit for the year ended 31 December 2024 was (₦680,626) million and ₦165,694 million, respectively (2023: ₦1,155,501 million and ₦1,268,503 million, respectively). In line with the provisions of the Fiscal Responsibility Act (the Act) 2011, 20% of the profit of the Bank will be credited to retained earnings while the balance will be paid to the Federal Government of Nigeria.

Corporate Governance

The Board of Directors is the highest policy making organ of the Bank and decisions of the Board are taken in consonance with submissions from various Board Committees and Departmental Directors.

The business and governance of the Bank has since then been carried out by them in compliance with Section 6 of the CBN Act, 2007.

The Board of Directors held 4 meetings between January and December 2024.

The Committee of Governors had held 22 meetings between January and December 2024.

The Committees of the Board are:

1. Committee of Governors
2. Finance and General Purpose Committee
3. Audit Committee
4. Governance, Nomination and Remuneration Committee
5. Board Risk Committee
6. Financial Systems Stability Committee

Apart from the Committee of Governors which is the Executive Management of the Bank, the composition of the other committees include the right mix of both the executive and non- executive Directors for effective and good corporate governance.

A centralised integrated risk management co-ordination function is performed by the Risk Management Department (RMD). The role of the RMD is to develop, maintain and promote an appropriate risk management policy, framework, approach and culture, methodologies, processes and support systems.

The Bank, as required by the Financial Reporting Council of Nigeria (FRCN), has carried out an assessment of Internal Control Over Financial Reporting (ICFR), which was certified by the Joint Auditors to be effective for the current reporting period.

CENTRAL BANK OF NIGERIA

REPORT OF THE BOARD OF DIRECTORS-Continued

The RMD is also responsible for coordinating and facilitating an integrated and uniform compliance management process in the group; advancing and facilitating specialised operational risk management processes, including business continuity, occupational health and safety and information security.

The Internal Audit Department of the Bank provides independent objective assurance of the adequacy and effectiveness of control, risk management and governance process of the Group.

Ethics Management

The Bank, as the Central Bank of Nigeria, is an institution of integrity which maintains the highest ethical standards. The executive management of the Bank is aware of this core value and expectation and commits itself to creating a working environment that encourages and facilitates honesty, integrity and ethical behaviour.

The Bank is committed to equality, meritocracy and international best practices.

Rashida J. Monguno

CENTRAL BANK OF NIGERIA

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2024

In accordance with the provisions of the Central Bank of Nigeria Act, 2007, the Board of Directors is responsible for the preparation of summary consolidated and separate financial statements which are prepared, in all material respects in accordance with the accounting policies set out on pages 18 to 41 which are derived from the IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), the recommended practice in the guidelines issued February 2018, revised annually for reporting period up to 31 December 2024 by the Financial Reporting Council of Nigeria (FRC), titled "Revised Accounting Guideline for Financial Reporting by the Central Bank of Nigeria" (the Guideline) as it affects Central Bank of Nigeria operations, the CBN Act of 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023.

The responsibilities include ensuring that:

- i the Central Bank of Nigeria keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Bank and its subsidiaries which are in all material respects in accordance with the accounting principles set out on pages 18 to 41 which are derived from the IFRS Accounting Standards, the recommended practice in the guidelines issued February 2018, and revised annually for reporting period up to 31 December 2024 by the Financial Reporting Council of Nigeria (FRC), titled "Revised Accounting Guideline for Financial Reporting by the Central Bank of Nigeria" (the Guideline) as it affects Central Bank of Nigeria operations, the CBN Act of 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023.
- ii appropriate and adequate internal controls are established to safeguard its assets and to prevent and detect fraud and other irregularities;
- iii the Central Bank of Nigeria prepares its summary consolidated and separate financial statements using suitable accounting policies supported by reasonable and prudent judgments and estimates that are consistently applied; and
- iv it is appropriate for the summary consolidated and separate financial statements to be prepared on a going concern basis.

The Board of Directors accept responsibility for the summary consolidated and separate financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates derived from IFRS Accounting Standards, the recommended practice in the guidelines issued February 2018, revised annually for reporting period up to 31 December 2024 by the Financial Reporting Council of Nigeria (FRC) titled "Revised Accounting Guidelines for Financial Reporting by the Central Bank of Nigeria" (the Guideline), the CBN Act of 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS-CONTINUED FOR THE YEAR ENDED 31 DECEMBER 2024

The Board of Directors are of the opinion that the summary consolidated and separate financial statements are prepared in all material respects, in accordance with IFRS Accounting Standards, the recommended practice in the Guideline as it affects Central Bank of Nigeria operations, the relevant provisions of the Central Bank of Nigeria Act No. 7, 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023 to reflect the state of the financial affairs of the Central Bank of Nigeria ("the Bank") together with its subsidiaries ("the Group") as at 31 December 2024, and of its financial performance and cash flows for the year ended 31 December 2024.

The Board of Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the summary consolidated and separate financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Board of Directors to indicate that the Group and Bank will not remain a going concern for at least twelve months from the date of this statement.

Signed on behalf of the Board of Directors by:

Governor:

FRC Number:

Mr. Olayemi Cardoso

FRC/2013/CISN/00000002200

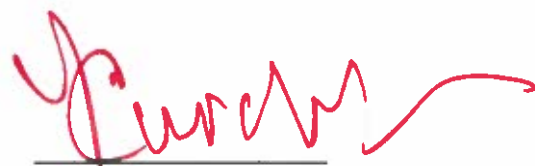

Deputy Governor:

INDEPENDENT JOINT AUDITORS REPORT ON THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

TO THE MEMBERS OF CENTRAL BANK OF NIGERIA

Opinion

The summary consolidated and separate financial statements, which comprise the summary consolidated and separate statements of financial position as at 31 December 2024, the summary consolidated and separate statements of profit or loss, the summary consolidated and separate statements of other comprehensive income, the summary consolidated and separate statements of changes in equity, and the summary consolidated and separate statements of cash flows and key notes and disclosures for the year ended are derived from the audited consolidated and separate financial statements (the "audited financial statements") of Central Bank of Nigeria ("the Bank") and its subsidiary companies (together the "Group") for the year ended 31 December 2024.

In our opinion, the accompanying summary consolidated and separate financial statements prepared in accordance with the Bank's framework for preparation, presentation and publication of the summary financial statements as approved by the Committee of Governors (COG) are consistent, in all material respects, with the audited consolidated and separate financial statements prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), the recommended practice in the guidelines issued by the Financial Reporting Council of Nigeria (FRCN) titled "Accounting Guideline for Financial Reporting by Central Bank of Nigeria" (the Guideline) in February 2018, revised annually for reporting period up to 31 December 2024, the relevant provisions of the Central Bank of Nigeria Act No. 7, 2007 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023.

Summary consolidated and separate financial statements

The summary consolidated and separate financial statements do not contain all the disclosures required by the IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), the recommended practice in the guidelines issued by the Financial Reporting Council of Nigeria (FRCN) titled "Accounting Guideline for Financial Reporting by Central Bank of Nigeria" (the Guideline) in February 2018, revised annually for reporting period up to 31 December 2024, the relevant provisions of the Central Bank of Nigeria Act No. 7, 2007 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023 applied in the preparation of the audited consolidated and separate financial statements of the Group and the Bank. Reading the summary consolidated and separate financial statements and the joint auditors' report thereon, therefore, is not a substitute for reading the audited consolidated and separate financial statements and the joint auditors' report thereon.

The audited financial statements and our report thereon

We expressed an unmodified opinion with emphasis of matter on non-compliance with Section 38 of the CBN Act on the audited consolidated and separate financial statements in our report thereon dated 16 April 2025. The audited consolidated and separate financial statements and the summary consolidated and separate financial statements do not reflect the effects of events that occurred subsequent to that date our report on the audited consolidated and separate financial statements. That report also includes the communication of key audit matters. Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period.

INDEPENDENT JOINT AUDITORS REPORT ON THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

TO THE MEMBERS OF CENTRAL BANK OF NIGERIA- Continued

Directors' responsibility for the summary financial statements

The Directors are responsible for the preparation of the summary consolidated and separate financial statements in accordance with the Bank's framework for preparation, presentation and publication of the summary financial statements as approved by the Committee of Governors (COG).

Auditors' responsibility

Our responsibility is to express an opinion on whether the summary consolidated and separate financial statements are consistent, in all material respects, with the audited consolidated and separate financial statements based on our procedures, which were conducted in accordance with the International Standard on Auditing (ISA) 810 (Revised) Engagements to Report on Summary Financial Statements.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

1 General information

1.1 Corporate information

The Central Bank of Nigeria ("CBN" or "the Bank") is the apex regulatory authority of the banking system in Nigeria. It was established by the Central Bank of Nigeria Act of 1958, as repealed by the Central Bank of Nigeria Act No. 7 of 2007. It commenced operation on 1 July 1959.

The summary consolidated and separate financial statements of the Group for the year ended 31 December 2024 comprises the Bank and its subsidiaries (together referred to as the "Group").

The Bank is wholly owned by the Federal Government of Nigeria and is a Government Business Entity (GBE). The principal objectives of the Bank are to:

- Ensure monetary and price stability;
- Issue legal tender currency in Nigeria;
- Maintain external reserves to safeguard the international value of the legal tender currency;
- Promote monetary stability and a sound financial system in Nigeria; and
- Act as banker and provide economic and financial advice to the Federal Government of Nigeria.

The Bank is incorporated and domiciled in Nigeria. Its head office is at Plot 33, Abubakar Tafawa Balewa Way, Central Business District, Abuja.

The Bank holds 89.52% of the share capital of Nigerian Security Printing and Minting Plc while Bureau of Public Enterprise and DE LA RUE of UK have 9.61% and 0.87% shares, respectively. The subsidiary is involved in the production of Nigerian currency notes and coins together with security documents and products for other businesses. The principal objectives of the subsidiary are:

- Production of Nigerian currency notes and coins together with security documents & products for other business.
- Manufacture and importation of printing ink and the provision of technical services.

The Bank holds controlling interest of 53.71% (equivalent to 89.52% of a 60% ownership) in Tawada Limited.

Tawada Limited is considered an indirect subsidiary of the Bank due to the Bank's 89.52% effective ownership in Nigerian Security Printing and Minting Plc, which holds a 60% ownership stake in Tawada Limited. The principal activity of Tawada Limited is the manufacture of inks used in the production of bank notes.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

1.1 Corporate information-continued

The Bank holds 100% of the share capital in Nigeria Incentive-Based Risk-Sharing System for Agricultural Lending Plc (NIRSAL). The subsidiary was set up by the CBN to spark agricultural industrialization process through increased production and processing of the greater part of the farm produce/output in the country to boost economic earnings across the value chain.

The Bank holds 99.99% of the share capital in Nigerian Electricity Supply Industry Stabilization Strategy Limited (NESI). The subsidiary is involved in the promotion of long-term sustainability and efficiency of the Nigeria Electricity Supply Industry through the initiation and encouragement of programmes and the creation of mechanisms and processes fundamental to the growth and bankability of the Nigerian Electricity Supply Industry.

The Bank holds 70% of the share capital in Infrastructure Corporation of Nigeria Limited (InfraCorp). The subsidiary was established to harness opportunities for infrastructure development in Nigeria by originating, structuring, executing, and managing end-to-end bankable projects, managed by reputable and highly experienced infrastructure asset managers and in partnership with public and private sector participants.

The summary consolidated and separate financial statements of Central Bank of Nigeria and its subsidiaries (collectively, the Group) for the year ended 31 December 2024 were approved and authorised for issue by the Board of Directors on 26 February 2025.

The summary consolidated and separate financial statements cover the financial year from 1 January 2024 to 31 December 2024, with comparative information for the year ended 31 December 2023.

1.2 Presentation of consolidated and separate financial statements

The Group presents its summary consolidated and separate statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within 12 months after the summary consolidated statement of financial position date (current) and more than 12 months after the summary consolidated statement of financial position date (non-current) are presented in the respective notes for assets and liabilities.

Financial assets and financial liabilities are offset and the net amount reported in the summary consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expenses are not offset in the income statement unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Group.

Investment in subsidiaries are carried at cost less impairment in the Bank's separate financial statements.

1.3 Functional and presentation currency

The summary consolidated and separate financial statements are presented in Naira and all values are rounded to the nearest million (N'm), except when otherwise indicated.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2 Basis of preparation

The summary consolidated and separate financial statements prepared in accordance with the Bank's framework for preparation, presentation and publication of the Summary Financial Statements as approved by the Committee of Governors (COG) are consistent, in all material respects, with the audited consolidated and separate financial statements prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Boards (IFRS Accounting Standards), the recommended practice in the revised guideline issued February 2018 and revised annually for reporting period up to 31 December 2024 by the Financial Reporting Council of Nigeria (FRCN) titled "Revised Accounting Guidelines for Financial Reporting by the Central Bank of Nigeria" (the Guideline) the relevant position of the CBN Act of 2007 and the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023. The provisions of the Guideline issued by FRC are set out in Notes 2.0.1 in the summary consolidated and separate financial statements.

The Guideline does not apply to the subsidiaries or associates and was applied by the Bank in the financial year beginning 1 January 2024.

The preparation of the summary consolidated and separate financial statements in conformity with policies derived from IFRS Accounting Standards requires the use of certain significant accounting estimates and judgements. It also requires management to exercise its judgement in the process of applying these policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the summary consolidated and separate financial statements are disclosed in Note 2.1.32.

2.0.1 Recommended practices as approved by the Financial Reporting Council of Nigeria in its Guideline

The effects of any accounting policy changes arising from adoption of recommendations in the Guideline is applied prospectively.

(a) Intervention loans

Intervention loans and receivables are measured at amortized cost using the effective interest method (EIM). In exceptional cases, as part of its central banking functions, the Bank may act as a lender of last resort by granting Intervention loans. This function is unique to the Bank and as such, the Bank remains the only market for this kind of loans. The Bank has adopted its contractual rate as the Effective Interest Rate (EIR) for measuring its intervention loans.

(b) Foreign exchange derivatives

Forward and spot purchases and sales are recognized on the statement of financial position at the respective final cash and other financial assets settlement date and not recognized in the financial statements between the trade date and settlement date.

(c) Impairment of financial assets

Financial assets that have low credit risk shall be assessed for 12-months expected credit loss for such financial assets, the practical expedient approach under the ECL model has been considered. Based on the unique nature of the Bank's role, there is a rebuttable presumption that ECL on sovereign loans, receivables from Federal Government and its agencies and sovereign securities held by CBN is zero.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2 Basis of preparation-continued

2.0.1 Recommended practices as approved by the Financial Reporting Council of Nigeria in its Guideline-continued

(d) Equity Investments

The CBN, following initial recognition of particular investments in equity to be measured at fair value through OCI, may subsequently remeasure such investments at FVTPL, based on alignment with the management focus, business model or other factors bordering on the mandate of the Bank.

(e) Gold

To better match the possible effects of any provision for gold price risk due to changes in spot price and exchange rate, the CBN may subsequently measure/remeasure monetary gold at fair value through Profit or Loss. Also, the cumulative fair value reserve shall be recycled to profit or loss.

2.1 Material accounting policies

The Group has consistently applied the following accounting policies to all periods presented in these summary consolidated financial statements, except if mentioned otherwise.

2.1.1 Basis of measurement

The summary consolidated and separate financial statements have been prepared on a historical cost basis, except for:

- debt instruments at fair value through other comprehensive income and equity instruments at fair value through profit or loss;
- gold that have been measured at fair value through profit or loss;
- land and building carried at the revalued amount using the revaluation model; and
- net defined benefit liabilities using the projected unit method.

2.1.2 Basis of consolidation

(i) Business combinations

The Group accounts for business combinations under the acquisition method when the acquired set of activities and assets meet the definition of a business and control is transferred to the Group (see 2.1.2 (ii)). In determining whether a particular set of activities and assets is a business, the Group assesses whether the set of assets and activities acquired includes, at a minimum, an input and substantive process and whether the acquired set has the ability to produce outputs.

The Group has an option to apply a 'concentration test' that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The optional concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment. Any gain on bargain purchase is recognised in profit or loss immediately.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies-continued

2.1.2 Basis of consolidation-continued

(ii) Subsidiaries

Subsidiaries' are entities controlled by the Group. The Group 'controls' an entity if it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group reassesses whether it has control if there are changes to one or more of the elements of control. This includes circumstances in which protective rights held (e.g those resulting from a lending relationship) become substantive and lead to the Group having power over an investee.

The financial statements of subsidiaries are included in the summary consolidated financial statements from the date on which control commences until the date on which control ceases.

Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the summary consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiary to bring its accounting policies into line with the Group's accounting policies.

(iii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(iv) Loss of control

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Reclassifies the parent's share of components previously recognised in OCI to income statement or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.
- Recognises any surplus or deficit in profit or loss

(v) Non-controlling interests

Non-controlling interest are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies-continued

2.1.3 Investment in associates

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries.

The Group's investments in its associates are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost which includes transaction costs. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

Dividend received or receivable from associates are recognised as a reduction in the carrying value of the Group investment carrying value.

The income statement reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

2.1.4 Recognition of income and expenses

(a) The effective interest rate method

Under IFRS 9, interest income is recorded using the effective interest rate (EIR) method for all debt instruments measured at amortised cost and interest bearing financial assets measured at fair value through other comprehensive income (FVOCI) under IFRS 9.

Interest bearing financial assets measured at FVOCI under IFRS 9 are also recorded by using the EIR method. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR for all financial instruments other than those measured at FVTPL. The Group recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the financial instruments. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations regarding the cash flows on the financial asset are revised due to credit risk, the adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the statement of financial position with an increase or reduction in interest income. The adjustment is subsequently amortised through interest income in the income statement.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.4 Recognition of income and expenses-continued

(b) Interest and similar income and expense

Net interest income comprises interest income and interest expense calculated using both the effective interest method. These are disclosed separately on the face of the income statement for both interest income and interest expense to provide symmetrical and comparable information.

In its Interest income/expense calculated using the effective interest method, the Group only includes interest on those financial instruments that are set out in Note 2.1.4a above.

Other interest income/expense includes interest on all financial assets/liabilities measured at FVTPL, using the contractual interest rate. Interest income/expense on all trading financial assets/liabilities is recognised as a part of the fair value change in net trading income. The Group calculates interest income on financial assets, other than those considered credit-impaired, by applying the EIR to the gross carrying amount of the financial asset.

When a financial asset becomes credit-impaired and is therefore regarded as 'Stage 3', the Group calculates interest income by applying the EIR to the net amortised cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Group reverts to calculating interest income on a gross basis and recognise reversal from the improvement in the profit or loss.

(c) Foreign exchange revaluation gains or losses

These are gains and losses arising on settlement and translation of monetary assets and liabilities denominated in foreign currencies at the functional currency's spot rate of exchange at the reporting date. This amount is recognised in the income statement and it is further broken down into realised and unrealised portion.

The monetary assets and liabilities include financial assets within the external reserves, foreign currencies deposits received and held on behalf of third parties, etc.

(d) Other operating expenses

All other operating expenses are recognised at cost when incurred.

2.1.5 Income taxes

Current income tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year, and any adjustment to tax payable or receivable in respect of previous years.

The Bank is not subject to tax in respect of its functions under the Central Bank of Nigeria Act 2007. The Bank is exempted from the payment of tax under the Companies Income Tax Act, Cap C21, LFN 2004 (as amended).

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.6 Foreign currency

(a) Foreign operations

Transactions in foreign currencies are translated into the respective functional currencies of Group companies at the exchange rates at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the year, adjusted for effective interest, impairment and payments during the year, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the year.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

(b) Foreign currency transactions

Transactions in foreign currencies are initially recorded at the functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss.

2.1.7 Financial instruments – initial recognition

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

2.1.7.1 Date of recognition

Financial assets and liabilities, except for loans and advances to customers, deposits, IMF related liabilities and other liabilities are initially recognised on the trade date. Loans and advances to customer are recognised when funds are transferred to the customers' accounts. The Group recognises deposits, IMF related liabilities and other liabilities when funds are transferred to the Group.

2.1.7.2 Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, and, except in the case of financial assets and financial liabilities recorded at FVTPL, transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price. When the fair value of the financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.7 Financial instruments – initial recognition-continued

2.1.7.3 Measurement categories of financial assets and liabilities

The Group classifies all its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost
- Fair value through other comprehensive income (FVOCI)
- Fair value through profit or loss (FVTPL)

The Group classifies and measures its trading portfolio at FVTPL. The Group may designate financial instruments at FVTPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies.

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost or at FVTPL and derivative instruments or the fair value designation is applied.

2.1.7.4 Financial assets and liabilities

2.1.7.4.1 Loans and receivables and Financial investments at amortised cost

The Group only measures Loans and receivables and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

a Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors.

b The SPPI test

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk.

Trade receivables

Trade receivables are measured at amortised cost, using the effective interest method, less accumulated impairment losses.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.7 Financial instruments – initial recognition-continued

2.1.7.5 Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Group enters into derivative transactions with various counterparties. These include forward, futures and swaps forex derivatives.

The Bank has applied the revised accounting guidelines issued by the Financial Reporting Council of Nigeria and had disclosed as part of contingent liabilities/assets the sales and purchases of forward, futures and swaps forex derivatives in pursuance of monetary policy implementation, price stability and or management of the Naira exchange rate. The forwards and swaps are not marked to market. Forward and spot purchases and sales shall be recognized on-balance-sheet at the respective settlement date and recognized off-balance-sheet from the trade date to the settlement date at the spot rate of the transactions.

Derivatives recognized in other foreign securities are measured at fair value through profit or loss.

2.1.7.6 Financial assets or financial liabilities at fair value through profit or loss

The Group classifies financial assets or financial liabilities as held for trading when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading assets and liabilities are recorded and measured in the statement of financial position at fair value. Net fair value gains or losses on financial instruments are recognised in other operating income. Interest and dividend income or expense is recorded in other operating income according to the terms of the contract, or when the right to payment has been established.

2.1.7.7 Debt instruments at FVOCI

The Group applies the new category under IFRS 9 of debt instruments measured at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI.

Interest income and foreign exchange gains and losses are recognised in profit or loss.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.7 Financial instruments – initial recognition-continued

2.1.7.8 Equity instruments at FVTPL

The Group has classified its equity investments as equity instruments at fair value through profit or loss (FVTPL). This classification is in accordance with the revised FRC Guidelines of 2024.

In the previous year, these instruments were measured at fair value through other comprehensive income.

Gains and losses on these equity instruments are recognized in the profit or loss. Additionally, equity instruments classified as FVTPL are not subject to an impairment assessment.

2.1.7.9 Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR.

2.1.7.10 Financial guarantees, and undrawn loan commitments

The Group issues financial guarantees and loan commitments.

Financial guarantees are initially recognised in the financial statements (within Provisions) at fair value, being the premium received. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and an ECL provision is recognised appropriately.

Undrawn loan commitments are commitments under which, over the duration of the commitment, the Group is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements.

2.1.8 Reclassification of financial assets and liabilities

Financial liabilities are never reclassified.

The Group reclassified investment in associate (AFC) and its unquoted equity investments in IILMC, NDIC and Afrexim from FVOCI to FVTPL in 2024 (2023: Nil). The reclassification was done in line with FRC Guideline for 2024. This application is prospective and the cumulative gains in fair value reserves were not recycled through profit or loss in line with the FRC Guideline.

2.1.9 Derecognition of financial assets and liabilities

2.1.9.1 Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired.

2.1.9.2 Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.9 Derecognition of financial assets and liabilities-continued

2.1.9.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the summary consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.1.10 Impairment of financial assets

Overview of the ECL principles

The Group records the allowance for expected credit losses for all loans and other debt financial assets not held at FVTPL, together with loan commitment and financial guarantee contract, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination..

The 12month ECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12month ECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group groups its loans and financial investment into Stage 1, Stage 2 and Stage 3, as described below:

- Stage 1: When loans or financial investment are first recognised, the Group recognises an allowance based on 12months ECLs. Stage 1 loans or financial investment also include facilities where the credit risk has improved and the loans or financial investment has been reclassified from Stage 2.
- Stage 2: When a loan or financial investment has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. Stage 2 loans or financial investment also include facilities, where the credit risk has improved and the loans or financial investment has been reclassified from Stage 3.
- Stage 3: Loans or financial investment considered credit-impaired. The Group records an allowance for the LTECLs.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.11 The calculation of ECLs

The Group calculates ECLs based on three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- **PD:** The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.
- **EAD:** The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, and accrued interest from missed payments.
- **LGD:** The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Group considers three scenarios (a base case, an upturn and downturn). When relevant, the assessment of multiple scenarios also incorporates how defaulted loans or financial investment are expected to be recovered, including the probability that the loans or financial investment will cure and the amount that might be received from selling the asset.

The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

The mechanics of the ECL method are summarized below:

- **Stage 1:** The 12months ECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs.
- **Stage 3:** For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these financial instruments. The method is similar to that for Stage 2 assets, with the PD set at 100%.

Loan commitments: When estimating LTECLs for undrawn loan commitments, the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the four scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. The ECL for loan commitments is recognised within other liabilities.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.11 The calculation of ECLs - continued

Financial guarantee contracts: The Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Group estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the four scenarios. The ECLs related to financial guarantee contracts are recognised within other liabilities.

2.1.12 Forward looking information

In its ECL models, the Group relies on a broad range of forward looking information as economic inputs, such as:

- Federal reserves
- Crude oil price
- Non performing loans

2.1.13 Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value.

2.1.14 Collateral valuation

To mitigate credit risk, the Group uses collateral where possible, including cash, securities, guarantees, receivables, inventories, and other credit enhancements.

2.1.15 Write-offs

Financial assets are written off when the Bank has no reasonable expectation of recovery. If the write-off exceeds the loss allowance, the difference is added to the allowance before being applied to the asset's carrying amount. Subsequent recoveries are credited to credit loss expense.

2.1.16 Cash and cash equivalents

Cash and cash equivalents as referred to in the statement of cash flows comprise, deposit held at call with banks, other short term highly liquid investment, bank overdraft, cash portion of investments in foreign securities, bank balances with foreign banks, sundry currencies and travellers' cheques and time deposits which are readily convertible into cash with a maturity of three months or less.

2.1.17 Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

i Group as a lessee

At commencement or modification, the Group allocates contract consideration to each lease component based on its standalone price. However, for branch and office leases, lease and non-lease components are accounted for as a single lease.

The Group recognises a right-of-use asset and lease liability at commencement. The asset is initially measured at cost, including the lease liability, pre-commencement payments, direct costs, and estimated dismantling costs for premises improvements.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.17 Leases-continued

Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term or asset's useful life and adjusted for impairments or lease liability remeasurements.

Lease liabilities are initially measured at the present value of lease payments, discounted using either the interest rate implicit in the lease or the Group's incremental borrowing rate—typically the latter. This rate reflects external borrowings, lease terms, asset type, and credit risk.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases (i.e. low value assets).

2.1.18 Property, equipment and right-of-use assets

Recognition and measurement

Plant, equipment, furniture, computers, laboratory equipment, and vehicles are measured at cost less accumulated depreciation and impairment. Changes in useful lives are treated as changes in accounting estimates.

Land is carried at fair value, while buildings are measured at fair value less depreciation and impairment. Valuations are conducted every 2–3 years to reflect fair value.

Revaluation surpluses are recognised in other comprehensive income (OCI) and credited to equity. Revaluation deficits are recognised in profit or loss, unless offset by prior surpluses. On disposal, any revaluation surplus is transferred to retained earnings.

Right-of-use assets are presented together with property and equipment in the statement of financial position. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and useful life.

Subsequent costs

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group. Ongoing repairs and maintenance are expensed as incurred.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.18 Property, equipment and right-of-use assets-continued

Depreciation

Depreciation is calculated to write off the cost of items of property and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Land is not depreciated.

The estimated useful lives of property and equipment for the current and comparative periods are as follows:

Asset category	Useful life (years)
Buildings:	
- Central air conditioners	25
- Lifts	25
- Buildings	50
Motor vehicles:	
- Buses	8
- Cars	5
- Lorries	10
Plant and equipment:	
- Air conditioners, generators and water pumps	7
- Currency processing machines	7
Plant and machinery	5
Furniture's and fittings	5
Computer equipment	3
Laboratory equipment	5
Right-of-use assets	Shorter of lease term and useful life

The Group commences depreciation when the asset is available for use. Land is not depreciated.

Capital work-in-progress is not depreciated as these assets are not yet available for use. They are disclosed when reclassified during the year.

Derecognition

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected. Any gain or loss on derecognition (the difference between disposal proceeds and carrying amount) is recognised in the income statement.

Residual values, useful lives, and depreciation methods for property, plant, and equipment are reviewed annually and adjusted prospectively, if needed.

2.1.19 Intangible assets

Amortisation is recognised in the income statement and reviewed annually for changes in useful life or consumption pattern. Assets are tested for impairment when indicators arise or annually during development. Intangible assets are derecognised when disposed of or when no future benefits are expected. Gains or losses on derecognition are recorded in profit or loss.

The annual amortisation rate for the current and prior year is as follows:

- Computer software 33⅓ %

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.19 Intangible assets-continued

Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development
- The ability to use the intangible asset generated

2.1.20 External reserves

The Group maintains a reserve of external assets consisting of Gold, Convertible currencies, Other foreign securities and International Monetary Fund (IMF) reserve tranche.

Monetary Gold

Gold reserves include monetary gold in the Statement of Financial Position at the prevailing closing spot market price as at reporting date. Changes in the fair value of gold reserves arising from price changes as well as related foreign exchange gains and losses are recognized in profit or loss and applied prospectively in line with the revised 2024 FRC Guidelines. In the previous year, Gold was measured at fair value through other comprehensive income

Convertible currencies

These are time deposits and balances with foreign banks and other foreign securities where the currency is freely convertible and in such currency, notes, coins and money at call.

Other foreign securities

These are securities of any country outside Nigeria whose currency is freely convertible and the securities shall mature in a period not exceeding five years from the date of acquisition.

These securities are further analysed into internally managed fund and externally managed fund. Internally managed fund is classified as amortised cost while the externally managed fund is classified as fair value through profit or loss.

All external reserve balances at year end are converted into Naira.

2.1.21 Fair value measurement

The Group measures financial instruments, such as investment in financial instruments classified as FVOCI and investments in financial instruments classified as FVTPL at each reporting date. Fair value related disclosures for financial instruments and non-financial instruments that are measured at fair value or where fair values are disclosed are, summarised in the related notes.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.21 Fair value measurement - continued

- Level 1 — Quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2 — Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

2.1.22 Other assets

Other assets are generally defined as claims held against other entities for the future receipt of money and payment for services to be enjoyed in future.

2.1.23 Employee benefits

(a) Defined contribution pension plan

The Group operates both defined contribution and defined benefit plans in line with the Pension Reform Act. Under the defined contribution plan, employees contribute 8% and the Group contributes 15% of basic salary, housing, and transport allowances. Contributions are remitted monthly to Pension Fund Administrators. The Group has no further obligations beyond these payments. Unpaid contributions are recognised as liabilities; expenses are reported under personnel costs.

(b) Defined benefit schemes

The defined benefit plans cover certain pensioners, gratuity obligations, and post-retirement medical benefits. The defined benefit pension scheme is funded with contributions made to a separately administered fund. The recognised liability is the present value of the defined benefit obligation less the fair value of plan assets.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding net interest (not applicable to the Group) and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through Other comprehensive income in the period in which they occur. Re-measurements are not reclassified to income statement in subsequent periods.

Past service costs are recognised in income statement on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset at the beginning of the year. The Group recognises the following changes in the net defined benefit obligation under 'personnel cost' in income statement:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

(c) Other long term employment benefits

These are all employee benefits other than post employment benefits and termination benefits which includes long service awards.

The amount recognised as the liability is the net total at the end of the reporting period of the present value of the defined benefit obligation and fair value of planned assets. The net total of the service cost and net interest are recognised in the income statement. The remeasurement of the defined benefit liability are recognised in the statement of comprehensive income.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.23 Employee benefits-continued

(d) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount and the obligation can be estimated reliably.

2.1.24 Provisions

(a) General

Provisions are recognised when there is a present obligation from a past event, it is probable that resources will be required to settle the obligation, and the amount can be reliably estimated. Reimbursements, such as from insurance contracts, are recognised as separate assets when virtually certain, with the related expense shown net of the reimbursement.

If the time value of money is significant, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. The increase in the provision due to time passage is recognised as other operating expenses.

2.1.25 International Monetary Fund (IMF) Related Transactions

The Group, on behalf of the Federal Government of Nigeria, manages assets and liabilities in respect of Special Drawing Rights (SDRs) with the International Monetary Fund (IMF). Exchange gains and losses arising from translation of SDRs at period ends are treated in accordance with note 2.1.6 above.

The Bank presents the holdings and allocations of the IMF SDR as an asset and liability respectively on the statement of financial position. These have been accounted for as financial instruments in accordance with IFRS 9. The holdings of the IMF SDR are classified as financial asset measured at amortised cost while the allocations of SDR are classified as financial liabilities at amortised cost.

(a) Holdings of Special Drawing Rights (SDRs)

The value of holdings from the IMF changes on the basis of foreign exchange transactions between the member countries. In addition, its value is affected by interests earned and paid as well as remuneration on the Bank claims in the IMF. SDR are presented at their nominal value plus interest accruing on SDR holdings and remuneration receivable, minus assessment fees and charges.

(b) Allocations of Special Drawing Rights (SDRs)

The allocation of SDRs takes the form of a counter account to IMF claims which are recorded based on their nominal value and presented in the statement of financial position as a liability.

(c) IMF related liabilities

IMF related liabilities represent other payables owed by the Bank to the General Resources Account of IMF. These are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. Interest is computed on the outstanding balance and it's capitalised.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.25 International Monetary Fund (IMF) Related Transactions-continued

(d) Quota in IMF

The quota in International Monetary Fund (IMF) is the reserve tranche held with the IMF by member states. The quota is treated as non-interest bearing instrument with no stated maturity. These are recognised initially at fair value and subsequently measured at amortised cost.

2.1.26 Bank notes and coins in circulation

Notes and coins issued are measured at cost as this liability does not have a fixed maturity date. The Bank notes and coins in circulation represent the nominal value of all bank notes, coins and digital currencies (eNaira) held by the public and banks, including recalled, still exchangeable bank notes from previous series.

2.1.27 Currency issue expenses

Currency issue expenses relate to expenses incurred in relation to the printing, processing, distribution and disposal of currency notes. This is recognised at cost when incurred.

2.1.28 Statutory transfer to the Federal Government of Nigeria

In accordance with Section 22(1) and (2) of the Fiscal Responsibility Act (FRA) 2007, the Group makes an annual transfer of 80% of its operating surplus to the Federal Government of Nigeria. This transfer occurs not later than one month after the publication of the Group's financial statements. The operating surplus is the residual income after meeting all approved expenditures as approved by the Board of Directors. The transfer is presented in the statement of changes in equity.

2.1.29 Central Bank of Nigeria Instruments

CBN instruments comprise Open Market Operation Bills and Promissory notes.

These instruments represent short term debt instruments of the Group issued to commercial banks as a liquidity management tool or to licensed commercial banks assuming net liabilities under the Purchase and Assumption distress resolution programme for banks which could not meet the minimum capital requirement. They are recognised at amortised cost.

Interests expense on these instruments are recognised in the statements of profit or loss using the effective interest rate method.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.30 Standards and interpretations issued but not yet effective

New and amended standards and interpretations that are issued but not yet effective are being assessed by the Group to determine the impact on the summary consolidated financial statements. As explained above, this would include standards and amendments that would already be effective based on the new standard or amendment, but the local endorsement is still in progress or has resulted in a later effective date.

- (a) Amendments to the Classification and Measurement of Financial Instruments—Amendments to IFRS 9 and IFRS 7- effective for annual periods starting on or after 1 January 2026.

Based on the initial assessment performed, the amendments in these areas are not expected to have a material impact on the financial statements, however, the assessment is yet to be concluded.

- (b) IFRS 18 Presentation and Disclosure in Financial Statements-effective for reporting periods beginning on or after 1 January 2027.

The Group is currently working to identify all impacts the amendments will have on the primary financial statements and notes to the financial statements.

- (c) Lack of exchangeability – Amendments to IAS 21-effective for annual reporting periods beginning on or after 1 January 2025.

The amendments are not expected to have a material impact on the Group's financial statements.

- (d) IFRS 19 Subsidiaries without Public Accountability: Disclosures-effective for reporting periods beginning on or after 1 January 2027.

The amendments are not expected to have a material impact on the Group's financial statements.

- (e) Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7 - effective for annual reporting periods beginning on or after 1 January 2026.

2.1.31 New and amended standards and interpretations

The Group has not early adopted any new standards, interpretations or amendments that have been issued but are not yet effective in these financial statements. Other amendments and interpretations apply for the first time in 2024, but do not have an impact on the Group's summary consolidated financial statements.

- (a) **Amendments to IFRS 16 - Lease Liability in a Sale and Leaseback**

The amendments in IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendments had no impact on the Group's summary financial statements.

- (b) **Amendments to IAS 1 - Classification of Liabilities as Current or Non-current**

The amendments to IAS 1 specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.

The amendments have not had an impact on the classification of the Group's liabilities.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.32 Material accounting judgments, estimates and assumptions

2.1.32.1 Judgements

In applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the summary financial statements:

Investment in subsidiaries and associates classification

The Group has a number of equity investments. It assessed the extent to which it has control or significant influence over those investees. The process of determining the existence of control or significant influence over the investees is an area that required the exercise of judgement. Some of the investees were set up by specific legislation, hence required judgement to be exercised in determining whether the Group had control or significant influence over the investee entities.

The Group determined that its investments in Nigeria Deposit Insurance Corporation (NDIC) are ordinary investments of the Group although the Group owns 60%. The Group cannot exert control or significant influence on the relevant activities as it has no power to appoint the board members.

The Group's investment in AMCON of 50% is held on behalf of the Federal Government of Nigeria in capacity as Banker to Federal Government of Nigeria. The Group also determined that its investments in Nigeria Interbank Settlement System (NIBSS), FMDQ-OTC Plc, Bank of Industry (BOI), Bank of Agriculture (BOA), National Economic Reconstruction Fund (NERFUND), Nigeria Commodity Exchange (NCX), Nigerian export Import Bank, Agricultural credit guarantee scheme fund and Nirsal Microfinance bank are associates of the Group, although the Group owns a 3.6%, 15.4%, 40%, 14%, 3.6%, 59.7%, 50%, 40%, and 15% respectively in the investees. The Group has significant influence over NIBSS, FMDQ-OTC, BOI, BOA, NERFUND and NCX through its representation on the board of directors.

The Group's investments in AFC has been assessed and the result of the assessment concluded that it no longer has significant influence over Africa Finance Corporation (AFC). Previously, the Group's 38.3% interest in AFC was accounted for an associate but reclassified in 2024 from an investment in associate to financial asset at fair value through profit or loss. This policy has been applied prospectively.

2.1.32.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques such as the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The financial instruments that fall under this category are equity instrument with significant unobservable inputs.

Impairment losses on financial assets

Impairment losses on financial assets - FRCN Guideline

Financial assets that have low credit risk shall be assessed for 12-months expected credit loss and for such financial assets, the practical expedient approach under the ECL model have been considered. Based on the unique nature of the Bank's role, there is a rebuttable presumption that ECL on sovereign loans, receivables from Federal Government and its agencies and sovereign securities held by CBN is zero.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.32 Material accounting judgments, estimates and assumptions - continued

2.1.32.2 Estimates and assumptions-continued

Financial assets other than trade receivables and sovereign securities

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment

- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs

Financial assets other than trade receivables and sovereign securities

- Determination of associations between macroeconomic scenarios and, economic inputs, such as ,prime lending rate ,unemployment rate, inflation rate and crude oil prices, and the effect on PDs, EADs and LGDs

- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

Provision for expected credit losses of trade receivables

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information.

Defined benefit plans

The cost of the defined benefit pension plan, long service awards, gratuity scheme and post-employment medical benefits and the present value of these defined benefit obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Depreciation and carrying value of property and equipment

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the carrying value of these items.

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024
(All amounts are in millions of Naira, unless otherwise stated)

2.1 Material accounting policies - continued

2.1.32 Material accounting judgments, estimates and assumptions - continued

2.1.32.2 Estimates and assumptions-continued

Revaluation of property, plant and equipment

The Group measures the land and buildings at revalued amounts, with changes in fair value being recognised in OCI. The land and buildings were valued by reference to transactions involving properties of a similar nature, location and condition. The Group revalued its land and building in the current year because valuations are performed every 2 - 3 years with sufficient frequency to ensure that the carrying amount of the revalued property does not differ materially from its fair value (the Group engaged an independent valuation specialist to assess fair values as at 31 December 2024).

Recognition and measurement of contingencies (litigations): Key assumptions about the likelihood and magnitude of an outflow of resources

The Group is involved in various litigations and arbitration both in Nigeria and in other jurisdictions, arising in the ordinary course of operations.

When the Group can reliably measure the outflow of economic benefits in relation to a specific case and considers such outflows to be probable, the Group records a provision against the case. Where the probability of outflow is considered to be remote, or probable, but a reliable estimate cannot be made, a contingent liability is disclosed. However, when the Group is of the opinion that disclosing these estimates on a case-by-case basis would prejudice their outcome, then the Group does not include detailed, case-specific disclosures in its financial statements.

Given the subjectivity and uncertainty of determining the probability and amount of losses, the Group takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents. Significant judgement is required to conclude on these estimates.

16 International Monetary Fund (IMF) related balances

The Central Bank of Nigeria is the fiscal and depository agent of the Federal Republic of Nigeria for transactions with the International Monetary Fund (IMF). Special Drawing Rights (SDR) are issued by the International Monetary Fund (IMF) to member countries and represent allocations available to these member countries in managing and meeting their sovereign payment obligations. Financial resources availed to Nigeria by the Fund are channeled through the Bank. The Bank presents the holdings and allocations of the IMF SDR as an asset and liability, respectively, in the statement of financial position. Repayment of the IMF loans as well as charges is the responsibility of the Bank. The SDR balances in IMF accounts are translated into Naira and any unrealized gains or losses are netted off in Other assets. The IMF calculates the daily value of the SDR in terms of the United States of America (US) Dollars by reference to a valuation basket of four currencies (USD, GBP, Euro & Japanese Yen).

CENTRAL BANK OF NIGERIA
NOTES TO THE SUMMARY CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 December 2024

(All amounts are in millions of Naira, unless otherwise stated)

30 Contingent liabilities and commitments

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities including financial guarantees. Even though these obligations may not be recognised in the summary consolidated and separate statements of financial position, they do contain credit risk and are therefore part of the overall risk of the Group.

31 Related party transactions

Central Bank of Nigeria is wholly-owned and controlled by the Federal Government of Nigeria (FGN).

The Federal Government of Nigeria also controls the Ministry of Finance Incorporated, other Government Ministries, Departments and Agencies (MDAs), Nigeria Securities, Printing and Minting Plc (NSPM), Nigeria Incentive-Based Risk-Sharing System for Agricultural Lending Plc (NIRSAL) and NESI Stabilization Strategy Limited (NESI). These entities (in addition to the key management personnel of the Bank) are related parties to the Central Bank of Nigeria.

Advances to the Federal Government of Nigeria

The transactions with the Federal government and fellow subsidiaries (under control of the Federal Government) are exempted from the disclosure requirement of IAS 24 due to their nature. However, material transactions and balances are disclosed.
